# PREFACE

A two-day National Executive Meeting of the Bharatiya Janata Party was held on 02-03 July, 2022 in Hyderabad, Telangana. The BJP National President Shri Jagat Prakash Nadda inaugurated the National Executive meeting in the august presence of the Hon'ble Prime Minister, Shri Narendra Modi. The venue of the meeting was filled with enthusiasm and energy of the BJP office bearers and the members of the National Executive.

In his presidential address, the BJP National President Shri Jagat Prakash Nadda said that under the leadership of the Prime Minister Shri Narendra Modi, the politics of caste, family and appeasement has ended in the country, and development has become the focal point of politics. He said that the Bharatiya Janata Party has set new dimensions in the electoral success. He emphasized on further strengthening the organization. He said that the states where the party has not been successful so far, it has to work there, and seek the blessings of the people. The organization has to be strengthened at every booth.

In the meeting, the first resolution, 'Economic and Garib Kalian Sankalp' was presented by the Defence Minister Shri Rajnath Singh, which was seconded by Leader of the House in Rajya Sabha and Union Minister Shri Piyush Goyal, and the Haryana Chief Minister, Shri Manohar Lal Khattar. The second resolution, which was 'Political Resolution', was presented by the Union Home and Cooperation Minister Shri Amit Shah and seconded by the Chief Minister of Karnataka, Shri Basavaraj Bommai and the Chief Minister of Assam, Shri Himanta Biswa Sarma. A statement on Telangana was also presented in this meeting. The meeting concluded with the address of the Prime Minister, Shri Narendra Modi. In his inspiring address, he called upon all the karyakartas and the office bearers to take the pledge to establish the country as 'Vishwaguru' during the 'Azadi Ka Amrit Kaal'.

In this booklet, we are publishing the Presidential Address, the address of the Hon'ble Prime Minister, full text of both the resolutions, and speeches of both the proposers and the seconders of these resolutions for our esteemed readers. Furthermore, the statement issued by the BJP on the state of Telangana and a brief description of the proceedings of the meeting are also published.

## PRESIDENTIAL ADDRESS

# WE HAVE TO WORK HARD AND MAKE THE ORGANIZATION STRONG: JAGAT PRAKASH NADDA

*The BJP National President, Shri Jagat Prakash Nadda addressed the BJP National Executive meeting held in Hyderabad, Telangana on July 02, 2022. Following is the edited text of the Presidential Address:*

First of all, on behalf of all the karyakartas of Telangana, I extend a warm welcome to all of you in this National Executive meeting. We are celebrating the 'Amrit Mahotsav', and we all have assembled here to be part of the ongoing celebrations. We know that under the leadership of Hon'ble Prime Minister Shri Narendra Modi, the Central Government has completed eight years. We also know that the Prime Minister has completed 20 years of his life as an administrator in a democratic system. It has not yet been possible for anyone to lead the government in a democratic system while holding constitutional post for 20 years. I extend a warm welcome to PM Shri Modi on behalf of all of us.

### **'AMRIT MAHOTSAV' CELEBRATIONS**

During the 'Amrit Mahotsav,' we recall with fondness the sacrifice made by the freedom fighters of India. There immense sacrifice paved way for our freedom. There were many freedom fighters whose names might not even be recorded in the history, but they also sacrificed their lives for freedom of our nation.

To celebrate 'Amrit Mahotsav', we are going to organize various programs remembering those 'Unsung Heroes'. We salute those who gave us freedom. As we celebrate 'Amrit Mahotsav,' we shouldn't entirely forget the history of Bharatiya Janata Party. The Bharatiya Janata Party expresses immense satisfaction that the purpose for which Dr. Shyama Prasad Mookerjee founded the Jana Sangh, and fought for 'Ek Desh Mein Do Nishan, Do Vidhan, Do Pradhan Nahi Challenge', has become a reality under the able guidance of Modiji, and the strategy of Amit Bhai. Today, 'Ek Desh Mein Do Nishan, Do Vidhan, Do Pradhan Nahi Challenge', has seen its end forever, and the Article 370 has become obsolete.

Pandit Deendayal Upadhyayji gave the principle of 'Integral Humanism' & 'Antyodaya', and had been following the idea of 'Antyodaya' in our programs. Our Prime Minister while successfully adopting the same principles gave the idea of 'Sabka Saath, Sabka Vikas, Sabka Vishwas, and Sabka Prayas'. It means taking everyone along in this journey of development; even the last person of the society should not be left behind, and the last person of the society should not stand on the last rung of the societal ladder. We feel proud that this goal has been fulfilled. Moreover, it is done in letter and spirit.

Today, we also express happiness and satisfaction with regard to the presidential election. Even after 75 years, if anyone has a vision for the tribals, then it is only Prime Minister Modi. He has proved it by declaring Smt. Draupadi Murmu as our Presidential candidate. The mantra of 'Sabka Saath, Sabka Vikas, Sabka Vishwas' has been realized with this. Shri Deve Gowdaji of JDS supported her candidature, and the previous day, Shiromani Akali Dal leader Shri Sukhbir Singh Badalji also supported Smt. Draupadi Murmuji. I thank him on behalf of the party, and appeal to the other parties to join this mission by rising above the party, and support Smt. Draupadi Murmuji.

## **MASSIVE VICTORY FOR BJP**

When we gathered in Delhi last time, we were preparing for the upcoming assembly elections. The elections were to be held in states like Uttar Pradesh which has a population of 24 crore. On

the other end, there were elections in Uttarakhand, Goa, and in the North-Eastern state of Manipur. The Bharatiya Janata Party won the elections in four out of these five states. In Uttar Pradesh, after 37 years, the government of any party formed again. We swept the elections in 23 districts. In these 23 districts, no other party won except the Bharatiya Janata Party. Talking about Congress, they fought in 399 seats, but its security was forfeited in 387 seats. As for Aam Aadmi Party, they contested 377 seats, and forfeited their deposits in 377 seats.

In Uttarakhand, the Bharatiya Janata Party won 47 seats. There, the Aam Aadmi Party contested with great enthusiasm on 70 seats. In 68 seats, it lost its deposits.

In Manipur, the Bharatiya Janata Party formed government with a full majority for the first time.

In Goa, we have come into government for the third time in a row. Here, we have celebrated a hat-trick. The Aam Aadmi Party contested on 39 seats, and in 35 seats, it lost its security deposits. TMC contested on 26 seats and lost its deposits in 21 seats. From Ladakh to Karnataka, from Goa to Arunachal Pradesh, we have won the local body elections. I won't go into numbers; it is a long list. But, I will say that in Ladakh, we have won the election of the Ladakh Hill Council which is a remarkable feat. Elections were held for the first time in the panchayats of Jammu and Kashmir, and the Bharatiya Janata Party won. Following the victory, the flag of the Bharatiya Janata Party was hoisted in Srinagar. We have won elections in Himachal Pradesh.

We have won the local body's elections in Haryana, Goa and Municipal Corporation elections in Chandigarh. We have registered a victory in the Municipal Corporation of Hyderabad and a victory in Puducherry. We have won all the elections in Gujarat and scored a victory in the local bodies of Uttar Pradesh. We emerged triumphant in local body elections in Rajasthan, where Congress is in power. In Arunachal Pradesh, the unilateral decision of the people has come in the favour of the Bharatiya Janata Party. In Assam, we won the elections with a 100% strike rate. In Tripura, elections were held on only three seats. The Bharatiya Janata Party won all of them. I congratulate Manik Shahji, who has taken oath

as the Chief Minister of Tripura. He won the elections along with his companions.

A week back, the results of the by- elections of Uttar Pradesh were announced. The seats of Azamgarh and Rampur, both of which are held by the Samajwadi Party, have also been won by the Bharatiya Janata Party. The Bharatiya Janata Party has been registering victories one after the other, whether it is the election of the local body or by-election. In 2019, NDA won by-elections in about 135 seats, and the Bharatiya Janata Party won by-elections in 100 seats. The politics of dynasty, family, corruption, communalism, and appeasement followed by opposition parties has been successfully beaten down by the politics of development under the leadership of the Prime Minister Shri Narendra Modi ji.

## **PRO-ACTIVE AND PRO-RESPONSIBLE GOVERNMENT**

The culture in politics has changed under the leadership of the Hon'ble Prime Minister. Now, only those governments will come into power which will perform the governments which will bring reforms and transformation. Only those governments will remain in power which are pro-active and pro-responsible. I am happy to say that under the Hon'ble Prime Minister, Pro-active and Pro-Responsible government is functioning at the Centre, and our governments in states have done a great deal of welfare work for the poor.

We are familiar with a drastic change in the working system of the the Bharatiya Janata Party. We have delivered what we promised upon geeting a chance. With the advent of the BJP; the poor, deprived, oppressed, exploited, Dalits, women, youth, and the farmers have been brought into the mainstream from the last rung of the society. It has been done by Modiji led NDA government, and our state governments. I can say with tremendous satisfaction that we will take this work forward.

We have started schemes which strengthen the poor, women and youth and bring farmers into the mainstream by empowering them. While talking about 'Jan-Dhan Yojana', there is no doubt that the manner in which financial inclusion has taken place through this scheme, and the manner in which the benefits of various

government schemes are reaching the poor is only due to the linking of 45 crore people with the Jan-Dhan account.

Earlier, a few thousand houses were built during previous governments, but today more than three crore and forty lakh houses have been constructed under the 'Pradhan Mantri Awas Yojana'.

'Pradhan Mantri Garib Kalyan Anna Yojana' has provided ration to 80 crore people in the last two years during the Corona pandemic. Under this scheme, 5 kg wheat or 5 kg rice, and 1 kg pulses were given to the poor families. Owing to this scheme, no poor slept hungry. Modiji's government has fulfilled this dream, and the state governments have implemented this on the ground. Electricity was provided to 2 crore and 62 lakh people under 'Saubhagya Yojana'. This is not a small number. Although we are celebrating 'Amrit Mahotsav', it is unfortunate that even after 75 years of independence; 2 crores 62 lakh houses do not have electricity.

In the same way, if we look at Atal Pension Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana, and Pradhan Mantri Jeevan Suraksha Yojana; these three schemes collectively account for giving social security to 40 crore people. That is, 30 percent of India's population has come under social security. If the population of Canada, Mexico, and America is taken together, it comes close to the number.

If we talk about farmers, the agriculture budget was raised from Rs 21 thousand crore to Rs. 1 lakh 24 thousand crores by our government. The Soil health cards have been distributed to 23 crore farmers. Now 100% Neem Coated Urea is in the market, and about 1000 Mandis are functioning under the e-NAM. The farmers have become digital, 22 Mega Food Parks have been established, and 119 new cold chains are being built. Arrangements have been made to transport perishable goods i.e., fruits and vegetables through 167 'Kisan Rails'. Through 'Kisan Udaan', an effort has been made to ensure that fruits and vegetables not only reach the national market but also go to the international market. If seen from the farmer's point of view, all these initiatives had never happened before.

While talking about the women empowerment, I would like to gladly mention 'Swachh Bharat' repeatedly because there were 11 crore sisters who had to go out in open to attend nature's call. Today, these 11 crore sisters have been empowered by building 'Izzatghar'(toilets) for them. They have been given the right to live with dignity.

If we talk about 'Ujala', under this scheme, about 73 lakh LED bulbs have been distributed. Under the glorious scheme 'Ujjwala', about 10 crore gas connections have been given which means empowering the housewives to live life with dignity and ease by giving them ownership of an essential amenity.

The 'Sahi Poshan - Desh Roshan' program has been introduced. Along with this, an effort has been made to provide maternity benefits to women by spending about Rs. 10 thousand crore through the 'Pradhan Mantri Matri Vandana Yojana'. Under this scheme all required vaccines are given to a woman from the time of pregnancy itself. If any complication arises after delivery, it is taken care of. Also, arrangements have been made to comfortably transport the mother and the newborn to their house. If any complication arises thereafter, they are brought back to the medical facility, and given the required treatment. Thereafter, for the next three years, 14 different vaccines are administered to the child and the mother to protect them against various diseases. We have given shape to this program in India under the leadership of Prime Minister Shri Modiji. So today, when we proudly say that India has changed; we need to consider these glowing facts which testify to the tremendous progress.

Many programs were introduced for our tribal and Dalit brothers under special schemes. Through Stand-up schemes, arrangements have been made for awarding them scholarships. It is an attempt to empower them.

Today, India has immensely progressed digitally. We are happy that India accounts for 40 percent of the global transactions that go digital today. In the year 2021-22, we have done about one trillion US dollars of digital transactions. The internet connections have increased by 231 percent, and 133 crore Aadhar cards have been issued.

Today, India has become amazingly digital, and Telangana bears testimony to it. It has 25 thousand booths in which the BJP workers have deposited 1000 rupees digitally. Undoubtedly, India is moving forward as Digital India.

When we talk of 'Aatmanirbhar Bharat', we must take into account the journey of our vaccination program. Previously, it used to take 20 years for each vaccine to reach India. Respected Modi ji has given us not one but two vaccines within a year, and today more than 197 crore doses have been administered in the country. Soon, we will cross 200 crore dosages. Apart from this, 200 million vaccines have been delivered to about 100 countries. And one crore 48 lakh doses have been delivered for free. In this incredible manner, we have taken the journey of development forward. After the Corona pandemic, whereas the world's GDP growth has stagnated at 6 percent, India stands at a growth rate of 8 percent to 8.7 percent in the estimates of international agencies. It is a clear testimony to the strong and 'Aatmanirbhar Bharat.'

When it comes to extreme poverty, then, even in the midst of Corona pandemic, extreme poverty has been brought down from one percent to 0.08 percent. It is no mean feat that India has been able to control poverty in the challenging Covid times. That our country and our government has been able to achieve this feat should be remembered. The poverty line, which was 22 percent, has now come down to 12 percent. That is, there has been a decrease of 10 percent in that too.

If we talk about electricity generation, we had set a target that 40 percent of electricity generation through non-fossil fuels. It was supposed to be completed after eight years, but under the able leadership of Prime Minister Shri Modi, India has completed this target eight years in advance. Forty percent of our electricity generation is now being done through non-fossil fuels. Ten percent ethanol was to be mixed with petrol; we achieved this target also five months ago.

Today, India has become a hub of exports. About 400 billion US dollars of exports took place in 2021. All of us should understand under the 'Gatishakti Yojana,' the infrastructure projects got a huge boost. I urge the Bharatiya Janata Party karyakartas to understand

this scheme in its depth, and present this scheme in the right perspective to the people.

From the point of view of infrastructure, the highways which were built in 2012-13 at the rate of about 12 km per day are being built at the rate of 37 km per day today.

Furthermore, metro is being established in 27 cities today, and 63 km of metro rail is being added every year. It is an attempt to add a new dimension to the exciting development taking place by leaps and bounds.

## **TRANSFORMING HEALTH POLICIES**

I would definitely like to discuss two policies. National Health Policy 2017- Many people do not notice that there has been a drastic change in the National Health Policy under the leadership of Modiji. We have now become creative along with preventive, promotional, proactive, and rehabilitative in our approach. Not only this, but we also emphasized the importance of health and wellness centres so that no one gets sick in the first place. One must remain healthy. This approach has now taken the centre stage. We have greatly focused on promoting health and preventive health. Moreover, we have built 15 All India Institute of Medical Sciences (AIIMS), and dozens of healthcare centres have also been built. Along with this, the chain of medical colleges has also been extended. The 'Ayushman Bharat' has been discussed time and again, but I will only say that it has brought a massive change in providing health facilities to the poor.

As far as the 'National Education Policy' is concerned, I would request all the members of the National Executive Committee to understand it thoroughly. In terms of 'National Education Policy', we know that many of our opponents always oppose us regarding our education policy, but this education policy has been appreciated by one and all. National Education Policy will provide not only an 'Affordable Education' but also 'Equal Opportunity', 'Flexible Education', and most importantly, a policy that allows teaching in Indian languages. Now, our children will be able to study engineering and medical sciences in their mother tongue. Now, even a child from a poor village can become a doctor.

Whether we talk about bolstering the capabilities of the defence forces or improved border security, these are pivotal pointers indicating the way the country and the government are progressing. Undoubtedly, we have many achievements to our credit. If I talk about the Border Roads, the work that was put on hold for a long time because a Defence Minister in the UPA government used to say that China would get angry if we built the roads. Under such circumstances, we strengthened the border road, and moved forward. At one time, our image was that of a corrupt country, that of a country lagging behind; at one time, people in the world saw us as a country which was left behind.

But today, under the leadership of Prime Minister Shri Modi, India has established itself as a strong nation. We do not say this; the world is saying it. Our children have just arrived from Ukraine; no other country even tried the rescue operation. What's more, children from other countries also stood holding the Tricolour of India in their hands, and arrangements were made to bring them too, India carried out their rescue as well.

More than 23,000 children were brought back to India within a month. The respected Prime Minister spoke to Mr. Putin and Mr. Zelensky for ceasefire to give window to our people. I want to congratulate our karyakarts who visited the homes of these children not once but thrice to console their family, and assured them that their children were safe – 'Modi hai to mumkin hai', your children would come back safely. We completed the task with remarkable determination.

While I am talking about the great achievements of our country, I say with a heavy heart that the opposition is irresponsibly and illogically misleading the people. We have to expose them. People may recall the people who asked for proof of the 'Surgical Strike' or the 'Air Strike'. These people demanded proof, and tried to mislead the country. For a long time, they themselves didn't enhance the capability of our defence forces, and when Rafale was brought to the country, the opposition tried to mislead the country by asking irrelevant questions.

It is a matter of great pride that the people of India have moved forward with the BJP and the NDA while showing immense faith in

Modiji's leadership.

An attempt was also made to mislead the people on Ladakh and Doklam as well. There was an attempt to mislead on CAA and NRC. There was an attempt to mislead on our agricultural reforms, too. They are trying to sabotage all the reforms which are required in the country. The opposition is only involved in stalling these reforms and in misleading the people. The saddest part is that while opposing the Bharatiya Janata Party and Modiji, they have started opposing the country.

### **PARIVARVAD-CORRUPTION RIDDEN OPPOSITION**

While on the one hand, our states are progressing tremendously, and developing continuously, the Congress or opposition ruled states are suffering from 'Parivarvad'. Here, in our states there is stability, whereas Congress or opposition ruled states are rampant with instability and large scale corruption.

We are moving ahead with 'Sabka Saath, Sabka Vikas, and Sabka Vishwas', but they are following the politics of appeasement, and their only aim is to carry forward vote-bank politics. Our BJP states are competing among themselves as to which state will do better work in rural development? Which state will do better work for the poor? Which state will open the maximum number of medical colleges? Which state will open the maximum number of engineering colleges? Which will provide maximum facilities to the people? On the other hand, opposition is competing as to who will appease the most? Who will do the most corruption? These governments are involved in dynasty politics and in furthering 'my family and me' politics. Therefore, we can say that as far as the Bharatiya Janata Party is concerned, our intention and policies are clear. We have moved forward with the mantra of giving strength to the poor, to empower them, to give them strength, and through them, the country marches forward. At the same time, the opposition is carrying forward its family, corruption, politics of appeasement, and proliferating these negative attitudes and practices.

### **THE SOCIAL ASPECT OF THE BJP**

As far as the BJP is concerned, I am happy that the party

has not only done good work in politics, but the party has also undertaken social work. I can say with great pride that lakhs of karyakartas of the Bharatiya Janata Party have done 'Seva Hi Sangathan' under the direction of the Prime Minister during the Corona period. They have served crores of people through 'Seva Hi Sangathan'. So we not only have a political side, we also have a social side. We are taking this work forward. Our people are now going to Anganwadi centres, going to sub-centres, visiting the school, involving themselves in nutrition program and connecting with Health Camps. Our objective is not only to do politics but also social work. We are trying to take that forward as well. Therefore, in the discussion held in the National Office Bearers meeting today, we have also taken up organizational programs. We have discussed ways of taking forward the organizational programs along with 'Sewa Karya'.

## **TRAINING PROGRAM**

The training holds great importance in our organizational work. Therefore, we in Bharatiya Janata Party take up the training program from the bottom level to the top once in every three years. I am happy to inform you all that our Mandal level training has been completed all over the country. Our district-level training has been completed, and now state level training program is going on. The related programs are also going on in many states. In many states, the training will be completed in this month of July, and by the month of August, we will complete all the training sessions.

As far as Good Governance is concerned, we are strengthening our research team with the vision of Good Governance and we are doing programs with the Chief Ministers with this vision. The programs are also being organized with the ministers. It is our mission to ensure that Good Governance program should be carried forward with transparency, and the research wing of the party should strengthen it. We are also sincerely engaged in this pivotal work.

## **BOOTH EMPOWERMENT**

As far as the program of booth empowerment is concerned,

the Prime Minister gave guidelines regarding empowering the booths. You will be happy to know that Bharatiya Janata Party has initiated a very ambitious program, and we have identified and implemented this at 50 thousand booths. In order to strengthen identified fifty thousand booths, we are about to complete our booth empowerment program. Today, this has been discussed in great detail, and we are going to take that forward. Along with this, we are keen to make progress in the program of 'Lok Sabha Pravas', and it is our endeavour to encourage our MLAs and MPs to take part in Lok Sabha program and exchange their views. We have identified about 144 Lok Sabha constituencies, and working on how they can be strengthened.

I am happy that about thirty ministers of the Government of India have declared their schedule. They are going there, and will take out 2-3 days for the pravass. Later on, we will assign these Lok Sabha duties in the form of 'clusters'. There will be many Pravass programs in the next two years in the form of clusters, and through those Pravass programs; we will fulfil our goal with diligence.

Every karyakarta of Bharatiya Janata Party is engaged with their full capacity in empowering the booths at their respective places. I also thank and congratulate all of you, and encourage you to take this program forward with all your might.

## **ORGANIZATIONAL WORK IN ADVERSE CONDITIONS**

As a special encouragement, I must say, I bow to my karyakartas of Jammu and Kashmir, the karyakartas of West Bengal and Kerala. I salute their dedication, and thank them all. They are working in unfavourable conditions. Today, our karyakartas are working in West Bengal with a strong resolve and steel determination. The respective state governments are harassing them by violating all the rules and regulations. The democratic values are being trampled upon. Despite that, they are working fearlessly.

In Kerala, we have been fighting for a long time. Hundreds of our karyakartas have been injured, and some have lost their lives. Despite that, our karyakartas are holding the 'Lotus Flag' high. I salute them. And given the work done by our karyakartas in the challenging situations in Jammu and Kashmir, the whole

country salutes them. I am happy that despite these adverse circumstances, the Bharatiya Janata Party is moving forward by leaps and bounds. This is the biggest thing which we have to understand, and keep in mind.

## **RELIEF WORK IN NATURAL DISASTER**

Today, as we have gathered here; we are concerned about the floods that occurred in the North-Eastern states. The party is with our governments which are doing commendable work in the midst of these floods. While showing our concerns, we direct the party to start rescue work in the affected places. The landslide hit Manipur and caused overwhelming number of casualties. We express our condolences to the families of the deceased. May their souls rest in peace, and their families find strength to deal with the inconsolable loss! The party should stand with the government there with full strength. After leaving from here, I am sure all the karyakartas of our North- Eastern states will be engaged in relief work. Our Manipur Chief Minister could not come as he had to stay back because of the land slide. The whole government is there. When there was flood situation in Assam, all our Karyakartas were engaged in the relief and rehabilitation works. So, while showing our concern, we must also associate ourselves with them and aid the relief work.

## **WORK WITH A GLOBAL PERSPECTIVE**

The Bharatiya Janata Party has added a new feather to its cap. We have become the largest party in the world with 170 million members, while the Communist Party of China has 90 million member. The world needs to be told about this rare accomplishment. It was for this reason that the Prime Minister inspired us to work from a global perspective. Along with the full-fledged External Affairs department of the Bharatiya Janata Party, the party is focusing on establishing relationships with the other parties of the world. This work should be taken forward with great zeal. In the last four meetings, through 'Know BJP' initiative, the party has established dialogue with 47 Ambassadors, and the Head of Missions are divided into four groups. The Bharatiya

Janata Party has tried to narrate the history and progress of the Bharatiya Janata Party from Bharatiya Jana Sangh days through a very short film. After watching this film, we discussed the current policy of the Bharatiya Janata Party. Thereafter, another one-hour session was held in which the ambassadors asked the questions, and we answered the queries.

I am glad that all the ambassadors expressed great satisfaction and appreciated for this program. They also thanked us, and they are greatly interested in 'Party-to-Party' contact. The Prime Minister of Nepal, Deubaji came to the party office, and met me as the National President of the Bharatiya Janata Party. When the Foreign Minister of Singapore Mr. Balkrishna came to India, he also visited the National Headquarters of the Bharatiya Janata Party.

Mr. Nan from Vietnam, who is ranked third in his party, also came. He tried to understand the history and functioning of the Bharatiya Janata Party. These accomplished personalities made effort to learn about the Bharatiya Janata Party. There is curiosity in the world about the party, and key personalities from various parts of the world want to know about the working system of the Bharatiya Janata Party.

## **EXPANSION OF BJP**

We know that the Bharatiya Janata Party is engaged in the work of taking forward the organization, and its ideology every single minute of their tireless work. Lakhs and crores of Karyakartas are involved in this huge work. We want to assure the Prime Minister and all of you that the Bharatiya Janata Party will move forward with tireless efforts and dedication. Wherever we are weak, we have to work in those areas, and make progress. There are some states where we are not in the government, and where we are weak - Telangana and Andhra Pradesh are some of those states. We have to also grow in Tamil Nadu, Kerala, and Odisha. Similarly, we have some assembly and Lok Sabha constituencies, where it is necessary to make the 'Lotus' bloom. We will take this work forward together. ■

## PM NARENDRA MODI'S ADDRESS

# COUNTRY HAS MOVED FROM 'TUSHTIKARAN' TO 'TRIPTIKARAN': SHRI NARENDRA MODI

*The Prime Minister, Shri Narendra Modi addressed the concluding session of the BJP National Executive meeting held in Hyderabad, Telangana on July 3, 2022. Excerpts:*

**R**espected President and all the senior colleagues of Bharatiya Janata Party. First and foremost, I congratulate all the Telangana Bharatiya Janata Party Karyakartas on behalf of all of you. The Executive Meeting is being held here almost after two decades. In the post- Corona period, an event with such a large number of participation, and the way the party President led the event with great enthusiasm, where all the office bearers of the organization participated, planned and executed tasks make this Executive Meeting special for us. Also, the meeting is taking place during the country's 'Amrit Kaal' of independence. In this 'Amrit Kaal,' the country is making new resolutions to progress. As I said earlier, where will be the country when it celebrates the centenary of independence? What will be the life of our ordinary citizens? What should be our place in the world? What will be our role in the world? These questions are of great importance. They are pertinent to work on these big dreams and convert them into reality. Every karyakarta should remain alert. We will leave this land of

Bhagyanagar in Hyderabad with a vow to accomplish our goals by sheer hard work. It is also very important for BJP as a political party that in the next 25 years, whatever role the BJP play as a party, we will play that role to serve the nation, whether in opposition or governance, at the village level or at the district level, at the state level or national level; we have to discharge our role with dedication. We have to guide ourselves and the organization with the roadmap for the upcoming 25 years, and simultaneously equip the government system to move forward with required policies, and bold decisions. This discussion is not the subject only for the Executive Meeting; this discussion should go on continuously at every level. I am happy that many important topics were discussed in the National Executive, and the way issues were presented here is heartening. In addition to the people, we traditionally listen to; many other colleagues have put forward their views here. Every view has offered a new perspective to politics, simultaneously giving an edge to the ideas with regard to information, and instilling confidence. All these ideas are very useful for us to prepare the future roadmap, and therefore, I heartily congratulate Naddaji and his entire team, and urge all of you to congratulate them too.

### **KARYAKARTA: POWER OF THE ORGANIZATION**

Hyderabad or Bhagyanagar being chosen for this program is fairly special in itself. Sardar Vallabhbhai Patel gave us 'Ek Bharat' on this soil of Hyderabad. Today, we are taking a pledge to make 'Ek Bharat' 'Shreshtha Bharat' from the same Hyderabad. It is the good fortune of all of us that in this historical and important period, our countrymen have been continuously entrusting us with new responsibilities. We have lived up to the expectations pinned on us. As a result, the expectations have risen, and so have the responsibilities. We need to multiply our efforts. From east to west, from north to south, the BJP is getting blessings from every section of society. We are getting a lot of love from people. When our karyakartas, the Executive Committee Members came through the assembly constituencies in Telangana, their words conveyed the message that if we work with pure heart, sincerity, and good intentions, then it reaches even the last person in the remotest corner of India. It does not require any medium. It spreads through word of mouth.

The message you brought from Telangana's the most remote villages demonstrates the people's feelings. And, when people have so much love and sentiments, we must dedicate ourselves for their welfare, work round the clock, and live up to the countrymen's expectations. We always have to remember that our identity is our 'cadre', our hard-working, loyal karyakartas! That is the strength of our organization. The organization through which we formulate policies, make decisions, and fulfill the hopes and aspirations of the nation has to move forward ringing the bells of constructive change.

The BJP is expanding itself with the power of karyakartas who speak different languages, wear different clothes, and have different values, and way of life. This diversity, in a way the organization of the Bharatiya Janata Party, itself represents the feeling of 'One India'. The spirit, the Sanskar, and the determination binds them in one garland by integrating the values of serving 'Bharat Mata' within them; they keep on making efforts to lay down their lives for 'Maa Bharati'.

## **RESOLVE TO SERVE MAA BHARATI**

If we see the Bharatiya Janata Party and its uniqueness- there are many states where we have not had the privilege of knocking on the doors of power for decades. We haven't got a chance to come in to power in such states. However, even today, our cadre, our workers have not stopped, are not tired, and have not bowed down even after several atrocities committed against them. Even today, they are engaged wholeheartedly in serving the motherland. What crimes have not been committed against our karyakartas in West Bengal? What is happening in Telangana? What is happening in Kerala? The politics of intolerance is at its peak. But overcoming all the crises, taking a pledge to serve 'Maa Bharati', thousands and thousands of karyakartas are passing the ideals of service from generation to generation, and giving unshakable leadership to the country. We, the karyakartas of the Bharatiya Janata Party, who have got a chance to sit in the corridors of power, have received tremendous respect. Irrespective of how high we reach in future, at present, even on the soil of Kerala, Bengal, and Telangana - there are many areas where we are nowhere in the political scenario. However, the ones who are still carrying our flag in those areas are our inspiration. From them, we can take inspiration. Today,

through the BJP Executive, I congratulate crores of such karyakartas in the country. We hear accounts of the awful situation of the country before 2014. We escaped those gruesome situations. Only those in power have a role in this is not true. Our Karyakartas have also shown exemplary restraint. As a result, our honor is intact even today. So, we are proud of our karyakartas. How fortunate we are to have karyakartas whom pride of being in power, the intoxication of power, and the frills of power couldn't touch! They are working with the resolve to serve the motherland like a lotus in the water. What can be a matter of more pride than this? What can be more satisfying than this? There is no dearth of political parties in India, and there are many parties that have been given an opportunity by the people to sit in power, and also given the opportunity to serve. They have been given power with hope and expectations, and it has been given repeatedly. However, today what is the condition of such people and those in power? What kind of practices are they adopting to safeguard their existence? The plight of these people once sitting at the helm of the affairs of the country is not a matter of mockery for us. Their downfall is not a matter of happiness for us. We must know about those evils and vices which led to their downfall. And they kept on sliding from place of power because of their malpractices. We have to move ahead by protecting ourselves from such malpractices, because we are neither working for ourselves, nor for our loved ones. We are working solely for the motherland, for the people of this country.

## **NATION'S FAITH IN BJP**

Eight years ago, the country reposed its faith in the Bharatiya Janata Party. The people bestowed their confidence in us. We all know what the condition of the country was then. We must not forget that period in Indian politics and governance. They want us to forget about that horrific phase. They are engaged in making people forget their sins. It is for this reason that they have to take shelter in concocted stories. From 2004 to 2014, and even before that, the country has not reached where it should have reached. Who are responsible for this? How was the loot and plunder done? How much corruption existed in the system? How much policy paralysis existed in the system? India's image in the world had become 'Negative'. No one was taking our

country seriously. People had lost faith in India. All hope was given up. There was an atmosphere of despair all around. People had no idea what will happen. Even confidence in the democratic form of government was shaken.

Nevertheless, you can imagine the change that took place in the country in 2014, and the path the people of the country chose. In 2019, they tested us. They had seen us, but in 2014 we were new. How fed up those people must have been? They took a leap of faith, and gave us a chance to see what happens with this choice. We did not break the trust of the people. Let us now leave the matter of 'policy paralysis'; the identity of our government is now 'P-2 G-2' or 'Pro- People and Proactive Good Governance.' If we analyze the entire Corona Pandemic period, one thing is clear- when the world was battling the Corona crisis; we were taking one step after the other to tackle the situation. We formed committees to produce vaccines for mass vaccination. The plans were made, and the scientists were engaged to tackle the situation which could grow to gigantic proportions.

### **FROM 'TUSHTIKARAN' TO 'TRIPTIKARAN'**

This country observes everything. With the advent of BJP, the feelings of despair turned into that of hope. Despair transformed into faith, and faith metamorphosed into reverence. Trust continues to grow. The country has moved from instability to stability, from stability to sustainability. That was a period of 'Tushtikaran'; this is a period of 'Triptikaran'. We talk about saturation. We are marching ahead with the satisfaction of gratification from all the plans. The Bharatiya Janata Party is moving forward from the period of 'Tushtikaran' to the period of 'Triptikaran.' Our goal is clear. We have to give a better future to the coming generations, and work for their bright future. We have to give confidence to the poor that their children will live a better life. You must have faced troubles. You must have lived in deprivation. The gas may not be lit in your house in the evening, but we assure you that we will not let such a time come in the life of your children.

### **DIRECTION OF PROGRESS**

In one of his addresses in Mumbai in 1965, Deendayal Ji raised

a question. Those questions and their contexts are equally important even today. Deendayal Ji had said that after independence, it was necessary to know the direction of our progress. Deendayal Ji had raised questions after 17 years of independence that there was no fixed direction for the country's progress. India got freedom in 1947, and he asked these questions in 1965, what is the direction, and where are we going? Where do we have to reach? Why are we going? How are we going? To whom will we go? What will we do? Nobody knew. Nearly two decades were about to pass, and even then, the country was reeling under confusion. Then Deendayal Ji raised questions. After this, the parties that remained in power for such a long period did not try to seriously explore these questions. Today, we say with satisfaction, with pride that on the basis of the seeds sown by our sages, our ancestors, all the erstwhile people of our party, and the path shown, we can say that the direction of progress of the country is fixed, and the country is also moving rapidly in that direction. Our dreams are fairly clear; our resolutions are also clearly defined. Our policy is also well thought out; our intention is also noble. Our decisions are also people-centric, and our policy has also been for the welfare of the people. Today, India's goal is to be self-reliant. Today, India's resolve is to make 'local', 'global.' Today, India's effort is to cooperate with the world, keeping its interests paramount. Today's India is taking pride in its heritage and creating new dimensions of development. Today's India moves with the mantra of non-discrimination, without partiality, 'Sabka Saath, Sabka Vishwas, and Sabka Prayas.' This direction of progress will take India to new heights in the 21st century. This path of progress will make India prosperous, and make life easier for every Indian.

## **ETERNAL INDIA**

Our culture, the 'tapasya' of our ancestors, and their philosophy for lives have given India immense strength to face the sternest challenges, and the reservoir of these values is eternal. Ages change, times change, countries are formed, countries sometimes get stuck, sometimes they move forward, and sometimes geography and history are destroyed. But this country is eternal, and it is going to stay eternal. In this period of Corona, we have experienced the power of

India. The world is astonished that at a time when there was a fear of increasing poverty around the world due to the global pandemic, the study revealed that poverty has reduced in India. Destiny has a role to play. Policies have made a difference. If efforts are made with a sincere heart, then only 'Siddhis' are attained.

## **VACCINATION CROSSING 200 CRORE**

At a time when economic activities all over the world were affected, big countries were struggling for development. Even in such challenging times, India remains the fastest growing economy. The world has accepted this. These figures are the figures of the world, the figures of the world's leading institutions. At a time when the global supply chain was fragmented, India was setting new records in exports. Progress is one thing, but when progress is stalled all around the world, it takes courage to find ways to progress. India has successfully done this.

At a time when vaccination was a mammoth challenge for the developed countries of the world, India succeeded in putting in place an impressive vaccination drive. Even today, its is a large part of the world that has not been able to vaccinate their population. At the same time, India is approaching to giving nearly two hundred crore vaccine doses. Now, developing a vaccine was a challenge enough, and spearheading a massive vaccination drive was supremely challenging. Despite these challenges, we achieved our goals. When the message of the priority of any work goes from the common government employee to the last person, from the Prime Minister to the Patwari- a feeling arises in everyone that vaccination is a pivotal task. It takes immense strength and planning to deliver in such testing times. In the face of difficult geographical and weather conditions; we successfully accomplishment our tasks. We have the sentiment that this is our country. These are our countrymen. It is our duty to save everyone's life. This feeling arises when we walk with the inspiration to live and die for the welfare of society. Thereafter, we administered two hundred crore doses. The drives against vaccination were witnessed around the world. Many a times, police was forced to do lathi-charge. But, our countrymen came out in support of the vaccination drive. See, this is the culture of this country- everybody's welfare, everybody's

happiness. The fears of the possible adverse effects of the vaccine did not cripple them. They thought if the vaccine was beneficial to the public, I will get it done. Because of this sentiment, every Indian got the vaccination.

We not only did our own vaccination, but also delivered about 250 million doses to the poor countries of the world. Extending help in the time of need and helping save lives, we successfully realized the spirit of 'Vasudhaiva Kutumbakam' with 'Sarvajan Hitay, Sarvajan Sukhaye'.

## **TRUE DEMOCRATIC VALUE**

There are many challenges before the world, but India is the country talking to the world about solutions. We have to maintain the momentum of progress of India. In the next 25 years of 'Amrit Kaal', India has to maintain the pace of all-round development. Whatever we do today, we will do it together - and this will build the future of coming generations along with our present. Another important thing to remember- today the country is tired of family politics, and orthodox mentality. And the results are visible. In the coming days, it will be difficult for such parties to sustain themselves. Note my words: India's young generation will never accept this mentality. The democratic methods are the only ways to get power in a democracy. We have to work with a purely democratic mindset. The democratic system has to be executed perfectly within the party as well. And what is the Democratic nature of us? How do we get thoughts, how are our sanskaras? These sanskars are not imposed. There are no political compulsions. There is also no cheap publicity stunt. There are values of True-Democracy. Staying true to these principles, we take pride in building the world's the largest statue of Sardar Vallabhbhai Patel who was the worker of Congress. Only one Prime Minister of the country was from within us; the rest belonged to the other parties. There have been Prime Ministers who tried to destroy us. But even then, we can only dare to build a museum for all the Prime Ministers because we have the values of True-Democracy. Only we could have dared to make 'Panchtirth' of Baba Saheb. We brought to the fore again the teachings of revered Bapu so that the world could learn from him and his ideals. We tried to revive Khadi because we have

grown up with the sentiment that what belongs to the country, and what is best is ours.

## **EVERY SUGGESTION IS WELCOME**

It has always been the culture of the Bharatiya Janata Party that we consider the advice and suggestions, and make decisions and policies along the lines of the advice and suggestions that come our way. Therefore, before making new laws and implementing new policies, there is a serious discussion with all the stakeholders. The suggestions are taken from people on the MyGov portal. This is also a great platform for public participation. But sometimes, I also feel very sorry that some political parties in opposition, which were in power for years, blindly oppose the people-friendly schemes, decisions taken in the interest of the country solely for their political selfishness. The public neither listens to them nor accepts them, and constantly rejects them.

## **OBSERVING ‘SEVEN SUTRAS’**

In the environment of negativity, it is very hard to put forward the positive facts; if I may say how much we have done against corruption in these eight years, its facts should also reach the public. We are the karyakartas but they are corrupt. How much we have done to eliminate corruption, we should keep talking about it by writing it in our journals so that the money coming from the people’s work should reach people. You would remember that I described ‘seven sutras’ for BJP karyakarta on the occasion of the National Executive in Prayagraj. I have repeated it whenever I get the opportunity. I want to repeat it today. I don’t say that these sutras are perfect. I will put these sutras in front of you again. This is for all of us – **service spirit, balance, restraint, coordination, positivity, sensitivity, and dialogue**. If these ‘seven sutras’ are followed in our lives, then we will be able to serve the party honestly. They will also help us make a separate identity in the society, and I am happy that the karyakartas of the Bharatiya Janata Party are walking on the same path with hard work. They are trying not to detract from these mantras; what can be a more proud feeling than that! Every karyakarta of the party is adopting these mantras; that is why such great service was done during the Corona period. It is because of these ideals that we could take up challenges during a

time of disaster. Due to your hard work, the central government has set a target of 100 percent saturation of all the schemes of public welfare.

We have chosen the path of taking the country from 'tushtikaran' to 'triptikaran'. Every karyakarts has a role in reaching 100 percent beneficiaries. Every unit of the governance system has a role.

## **BLESSINGS OF MOTHERS & SISTERS**

I have one more request. Today, our mothers, sisters, and women of the country are giving blessings to the Bharatiya Janata Party. So, we have to understand their sentiments keenly. We have to understand their power. You cannot imagine the blessings we are getting from mothers and sisters. The karyakartas of Bharatiya Janata Party have always kept this point, and this reflects in our policies, and everything, even in the design of our programs. I am glad that in this Executive Meeting; our sister workers were given opportunities in every task, including conducting the stage tasks of the Executive Meeting. I congratulate the President for this. This tradition should continue in other states and districts as well.

Furthermore, I am not talking about the active political role of women activists. I am talking about 50 percent of the population of the country. I am talking about this power. You cannot imagine that we are getting so much power from them. We reached out to every woman beneficiary. May we stand together with them in happiness and sorrow! Every worker should keep doing such efforts continuously. I would like to make a special request that the representatives of the BJP should take this feeling among the people that after many years of independence, for the first time, a tribal woman is going to adorn the president's post. This moment is ripe with the sentiment that defines the deprived, Dalit, exploited, tribal society with a new identity, and their pride in the 'Amrit Kaal'.

## **SPECIAL ATTENTION TO FIRST-TIME VOTER**

Among other efforts, we should also aim to bring more and more youth together, train them to lead in the future. We can work on different fronts to bring together the youth who are not directly in politics. I have already given some suggestions. I am sure new plans will be made in line with them. We should pay special attention to the first-

time voters. The ones who are getting the right to vote for the first time. It is a momentous event in one's life. They are becoming a part of the decision-making process of the country; this pride should be infused in them. Becoming a voter is not a routine task. A huge responsibility comes with the right to vote. A huge opportunity also comes up with it. We should communicate these views to them. And, it should be done by going among the youth.

## **NATION FIRST**

“Sabka Saath, Sabka Vikas, Sabka Vishwas and Sabka Prayas” should be in everything we do. Connecting us with people increases our strength in diverse ways. To spread the spirit of ‘Ek Bharat, Shreshtha Bharat’, we have to connect with the people. The meaning of the expansion of BJP is ‘Nation First’. If we have any ideology, then there is only one that is ‘Nation First’. If we have any program then there is only one- ‘Nation First’. There is no need to get into unnecessary controversies.

## **WE HAVE TO FOLLOW DEVELOPMENTAL AGENDA**

We should not forget the ideals we have set the sight on. People have accepted us. People have approved of us. The public has given us the blessings. But there are many groups which put obstructions in the path of truth. You must have seen earlier that there were plans for the poor, the farmers, the villages, the cities, and the middle class in the party's manifesto. There are hundreds of things, but the first question they used to ask is what about Ram Janmabhoomi? And who were the ones asking? Those who call themselves the most secular of us all. They ask such questions because they do not want true identity of the BJP to reach the people. They want us to remain entrenched in the same identity. It was many years ago. I was not in politics at that time. Atal ji came to Gujarat for some program. We had also called some Sangh workers early in the morning that year.

In the meeting, one of our workers asked Atalji if we should speak about the farmers and the poor. Atalji said that he had a press conference the day before and he spoke about the farmers and the poor, but the newspapers did not even write a line in their columns about the poor or the farmers. What was taken from that address was

something on a cow related issue. It is a clear indicator that they want us to keep sticking to those issues . They try to limit us to one place. Sometimes, we get stuck too. But, we have to follow our development agenda. The work we are doing has to be emphasized time and again. If someone keeps tying us up in the old issues, we have to stay away from them. And we should get skilled in such matters.

## **POLITICAL INTOLERANCE**

Today, we ask the question : Is the 'Azadi Ka Amrit Mahotsav' a program of the government? Is 'Azadi Ka Amrit Mahotsav' a program of the Bharatiya Janata Party? Is this 'Azadi Ka Amrit Mahotsav', Modi's program? It is meant for the whole country. You just search and find out how many political parties have organized programs on the 'Azadi ka Mahotsav'. How many are coming forward to celebrate the 'Azadi ka Mahotsav.' If you do not want to join us, organize such a programs. The country has become independent. You are also getting the benefit of freedom. But this is an example of the worst kind of political intolerance. If we were in power, we would come forward to join such celebrations. During the 'Azadi ka Mahotsav,' ponds are to be built in every district. With everyone's effort, the full potential of the Bharatiya Janata Party should be used. We should be ready to pick up a shovel at some point, and contribute our efforts towards this mission. Let us get involved in the pond digging process. 'Kar Sewa' should be done. In the country, we have to make our identity through our actions, conduct, effort, and hard work.

## **WELFARE OF THE PEOPLE**

This 'Amrit Kaal' of 25 years will usher in a bright future for the BJP as well as our mighty nation India. We all have begun our journey with the dream of building a 'New India.' Let us follow the decisions taken in the working committee. Taking the Bharatiya Janata Party to new heights is not just about getting power, but it is more importantly about taking India to great heights. It is for the welfare of the country's people. Let us carry this one sentiment in our hearts. With this profound sentiment, I wish you the very best. Once again, I thank the people of Telangana for their dedication. ■

## RESOLUTION-I

### ECONOMIC AND GARIB KALYAN RESOLUTION

*Full text of the 'Economic and Garib Kalyan Resolution' passed in the BJP National Executive meeting held in Hyderabad, Telangana on July 02, 2022.*

Over the last eight years of the government under the Bharatiya Janata Party-led National Democratic Alliance with Prime Minister Shri Narendra Modi at the helm, India has been marching ahead on the key principles of 'Sabka Sath and Sabka Vikas'. The key drivers of the growth story of India, the sixth-largest economy in the world, are, and will continue to be, the Prime Minister's vision of Atma-Nirbharata and Garib Kalyan. India has indeed shown speedy growth since PM Shri Narendra Modi came to power in 2014. The massive growth achieved in these eight years was the outcome of the Prime Minister's vision. We remember his victory speech barely a few hours after the sweeping win in the 2014 general election. One thing that stood was his promise for inclusive growth. He knew he had to make structural changes in the delivery system. During the Congress regime the schemes and policies were mostly on paper. There were holes in its delivery system. Pilferage was common. But Shri Modi's government implemented policies and programmes on the ground. His delivery system included last mile delivery. The secret of this success is the Prime Minister's mantra of 'Sab Ka Sath, Sab Ka Vikas', growth for all. The government schemes and programmes during the Congress regime were selective, they were often targeted at selected groups or caste who were their vote bank. The BJP government under the leadership of Shri Modi ensured government schemes are meant for all.

Another paradigm shift in PM Modi's thinking was to make India self-reliant or Atma Nirbhar.

Prime Minister Modi exuded confidence that we have the

resources, we have the manpower, we have the best talent in the world. We will make the best products; improve the quality of 'Made in India' products and even more. The concept of Prime Minister Shri Modi's self-reliant India is based on 'Vasudhaiv Kutumbakam'. - when India talks about self-reliance, it does not advocate for a self-centred system. In India's self-reliance, there is also concern for the happiness, cooperation and peace for the whole world.

### **FIVE AREAS HAVE BEEN CHOSEN BY PRIME MINISTER SHRI MODI FOR PUSHING INDIA TOWARDS THE SELF-RELIANCE GOALS:**

- **Economy** – An economy that brings quantum jump, not incremental change.
- **Infrastructure** – An infrastructure that becomes the hallmark of modern India to attract foreign investments
- **System** – A system that involves adopting modern technology and increasing the use of digital technology in the society.
- **Demography** – Making best use of our Its vibrant and young demography.
- **Demand** – We have a large domestic market and demand segment, which needs to be tapped to its full potential.

### **COVID RELIEF AND RECOVERY**

Soon after assuming office, along with the entire world during the Covid-19 pandemic, India faced unprecedented challenges of a global pandemic. India not only succeeded in safeguarding its own people and extending a helping hand to almost 100 nations, but also emerged stronger. Efficient administration, well-calibrated policy responses and an unwavering commitment to serve 1.35 billion citizens underpinned the success.

The vaccine production and rollout program is a remarkable success story, and India administered more than 191 crore vaccine doses in 1½ years, Unlike the polio vaccine, for which India had to wait for 30 years after it was discovered abroad, for Covid-19, India not only developed its own indigenous Covid-19 vaccine called Covaxin almost immediately, but also produced together with it, on a partnership basis, Covishield, the vaccine developed abroad.

Upholding the government's motto of Vasudaiva Kutumbakam, India exported vaccines to about 100 nations.

Health infrastructure was vital for containing both mortality and morbidity through the pandemic and this infrastructure was ramped up rapidly in the last couple of years. For example, the number of beds in Intensive Care Units (ICU) in the country was increased from 2,168 in March 2020 to 1.39 lakh by January 2022. During the same reference period, with similar increases in number of isolation beds, oxygen-supported beds, Pressure Swing Absorption (PSA) plants (oxygen plants) across the country, and manufacturing capacity for Personal Protective Equipment (PPE) kit, it was a robust transformation of the country's health infrastructure.

## **ECONOMIC REVIVAL – INITIATIVES AND MACRO-OUTLOOK**

Covid-19 disrupted economic activity not only in India but also across almost all the countries in the world. Fears of infection affected labour force participation as well as employers' willingness to engage workers. In many cases, to contain the spread of infection, lockdowns imposed by governments affected economic activity. In an interconnected world, output disruption in one location broke down the supply-chain and affected economic activity in a host of locations. With efficient management of the pandemic, rate of growth of GDP at constant prices in India which had gone down to -6.6 per cent in 2020-21, grew by an estimated 8.7 per cent in 2021-22. There are palpable signs of a resurgence in the housing market.

Since the onset of the pandemic and Ukraine war, our government has taken many extraordinary measures. We have launched schemes and taken measures to benefit ordinary men and women of this great country directly. We have taken steps to give a leg up to small businesses

And of course all this needed a big injection of funds. Our PM has safeguarded the future of this country by launching some long term schemes. We salute the wisdom and farsightedness of our PM who has ensured that we do not spend beyond our means and do not punch above our weight to ensure that both Debt/GDP ratio and path to fiscal prudence remains within the stated parameters of our government.

Many have cherished the goal of India's buoyant export performance. There are signs of this goal being achieved. Services exports in 2021-22 grew by 21.3 per cent to achieve the target of \$250 billion. India's overall exports (merchandise and services combined) in 2021-22 increased by 34.5 per cent to reach \$669.65 billion. The value of iron and steel exports increased from \$7.64 billion in 2013-2014 to \$19.25 billion in 2021-2022. Similarly, export of electronic goods grew by 88 per cent in 8 years since 2013-14, that of tractors grew by 72 per cent and of engineering goods by 49 per cent. Exports of mobile telephones increased from around Rs. 1,300 crore in 2017-18 to about Rs. 43,000 crore in 2021-22.

The government has maintained growth with strong macroeconomic fundamentals and this soundness is adequately reflected in investor sentiments. There have been large increases in the number of registered investors. Foreign investors, like their domestic counterparts, have expressed their confidence by investing increasingly large sums. FDI inflows touched a high of \$83.5 billion in 2021-22. Prior to 2014, the previous high was \$36.5 billion in 2013-14.

Credit extended by Scheduled Commercial Banks (SCBs) grew by 8.6 per cent in 2021-22. The recovery of credit growth to pre-pandemic levels is an encouraging sign and is likely to accelerate overall economic growth. Some schemes have been launched keeping in mind future opportunities and building of 'New India'. Some scheme such as The Production Linked Incentive (PLI) scheme that pushes job-intensive manufacturing, It propels manufacturing in various sectors like large-scale electronics, solar, textile, LED light and automotive products. Scheme worth Rs. 1.97 lakh crore for 13 key sectors is being implemented with a large potential to create jobs in the manufacturing sector. Our government has acknowledged the dependency on global players for supply of micro chips. We are pleased to mention that PM Modi has taken initiative and given strong push for manufacturing of micro chip to meet the growing demand of IT without depending on import.

Under the Emergency Credit Line Guarantee Scheme (ECLGS) for Medium, Small and Micro Enterprises (MSMEs), the government sanctioned Rs. 3.19 lakh crore. Rs. 1.8 lakh crore worth of assets were

saved from becoming non-performing assets (NPAs). This support by the government saved 13.5 lakh MSMEs in the country which are vital for India's industrial growth. The scheme not only provided financial cushioning to small and medium-scale enterprises but also saved 1.5 crores of jobs resulting in saving livelihood of nearly 6 crore people. The Reserve Bank of India in its Financial Stability Report of June 2022 said that the gross NPA ratio in March 2022 fell to a six-year low of 5.9 per cent.

Another project that looks far into the future is PM GatiShakti - National Master Plan for Multi-modal Connectivity. This Rs. 100 lakh crore multi-modal connectivity plan will provide integrated and seamless connectivity for the movement of people, goods and services from one mode of transport to another. It will facilitate the last mile connectivity of infrastructure and also reduce travel time for people. The sheer scale of this project means that thousands of jobs will be created in the infrastructure sector.

The Prime Minister, having reviewed the human resources in all government departments, has promised to create 10 lakh government jobs. Government announcement to recruit in "mission mode" will help job seekers in sectors such as defence, railways and revenue. The Agnipath scheme proposed by the Government will give a unique opportunity to the youth not only to fulfil their dream of joining the armed forces and serving the nation, but also empower, discipline and skill them.

The Government has maintained reasonable price stability in the last eight years. Recently, there has been upward pressure on prices of commodities and crude oil due to disruption in supply chain globally. It has resulted in both Consumer Price Index (CPI) and Wholesale Price Index (WPI) going up compared to previous months. The western world is experiencing the highest inflation in last 40 year. Despite high inflation in other countries and the geostrategic uncertainties, our Government has taken measures including repeatedly reducing the petrol and diesel prices to maintain reasonable price stability. Inflation under Modi government is much lower than what India has seen during UPA regime when it has exceeded even 11%.

Goods and Services Tax (GST), introduced with the idea of “One Nation, One Market, One Tax,” has been acclaimed as the largest indirect tax reform in the history of India. Introduced to have a uniform tax on the supply of goods and services across the country, GST eliminated the multiplicity and cascading effects of taxes. It is a good measure of the economy’s growth and it is a matter of some satisfaction that GST collections exceeded Rs. 1.68 lakh crore in April 2022. Significant efforts in audits and analytics have also led to a drive against tax evaders, inculcating a tax compliance culture. Going forward, it will be important to maintain the momentum and improve the tax compliance culture.

## **POVERTY ALLEVIATION**

Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) was one of the largest national poverty alleviation schemes started in the backdrop of COVID. Under this scheme, 80 crore people were given free ration for 25 months. The scheme has been under implementation since April 2020 and is the largest food security program in the world. Under the scheme, the government has spent Rs. 2.60 lakh crore so far and another Rs. 80,000 crores will be spent over the next 6 months until September 2022. PMGKAY has played a pivotal role in reducing extreme poverty, a role which has been recognised even by the International Monetary Fund (IMF) and World Bank.

## **UPLIFT THE FARMING COMMUNITY AND IMPROVE THEIR EASE OF LIVING**

Kisan Samman Nidhi is a game changer - About 1.82 lakh crores given to 11.78 crore farmers in 10 installments so far directly into their accounts

In the five years from 2009 to 2014 (Manmohan government), there was a marginal increase of 8.5 percent in the agriculture budget.

At the same time, after the coming of Shri Narendra Modi government, between 2014 and 2019, about 38 percent in the agriculture budget has increased. This figure is a proof of the farmer-friendly intention, policy and leadership of the Modi government.

## **ECONOMIC BENEFITS OF SOCIAL SECURITY SCHEMES**

Over decades, governments have been struggling with half-hearted approaches to addressing complex distributive justice and intergenerational social security problems. The BJP government has made policy-making inherently inclusive of the poorest sections of our society. At national and international forums, the Prime Minister has been the first to focus sharply on issues such as sanitation which is central to the well-being of the rural population. The design and effective implementation of nationwide schemes like Swacch Bharat, Ujjwala, PM Awas Yojna, Saubhagya, and Jal Jeevan Mission have ensured that the lives of millions of poor people have been radically transformed. Their ease of living has improved manifold.

Jal Jeevan Mission aims to install tapped water in all households. The mission is aggressively working for the betterment of 'quality of life' and enhanced 'ease of living' for women who spend long, tiresome hours every day collecting water. 83 districts in the country have already become 'Har Ghar Jal' districts. Households with tap water connections have exponentially increased in the past two years. They have risen to over 9 crore which is 47.19 per cent of households an increase close to 17 per cent. This mission will be completed by 2024 when all the households in the country will have safe tapped water.

Pradhan Mantri Ujjwala Yojana has provided concessional LPG connections, thus according women greater dignity by way of ownership of an amenity. The Ujjwala Yojana affords women a smoke-free environment and alleviates the drudgery of collecting fuelwood, saving them time and health issues. Lower subsidy allocation for LPG in Budget 2022-23 is a heartening indication of a near 99 per cent saturation of LPG penetration in India. These are long strides towards decreasing the carbon intensity of the country as announced by the Prime Minister in the Climate Change Conference (COP26) at Glasgow.

Social welfare schemes like Ayushman Bharat and Swacch Bharat Abhiyan keep households from falling into the trap of health poverty. This accomplishment goes unnoticed as it's a product of prevention rather than cure. Ayushman Bharat guarantees quality medical care to the poorest 500 million Indians with a health

insurance coverage of Rs 5 lakh per family annually.

## **FINANCIAL AND DIGITAL INCLUSIVITY**

Financial and digital inclusivity were addressed early with the launch of the Pradhan Mantri Jan Dhan Yojana and Digital India. Over 55 per cent of all Jan Dhan bank accounts are held by women, benefiting over 24.42 crore women. A study conducted by NABARD showed that, out of 11 million bank-linked self-help groups, exclusive women self-help groups are 9.7 million. With control over their own bank accounts, these women have access to an array of banking tools.

The JAM trinity that is Jan Dhan account, Aadhaar and mobile together, is providing tremendous financial autonomy to women. These robust and nationally executed policies paid off in times of dire need like the COVID-19. Rs 30,944 crore (Rs. 500 over three months) was disbursed to women as Direct Benefit Transfers through Jan Dhan accounts. The JAM trinity has also ensured that benefits from more than 400 government schemes are transferred directly to the beneficiaries' accounts without any intermediaries and concomitant leakages. Furthermore, as part of the Pradhan Mantri Garib Kalyan Package, more than 14 crores of free LPG refills were provided to the Prime Minister Ujjwala Yojana beneficiaries during COVID-19. India has experienced a silent digital revolution in terms of explosion in real-time transaction. In 2021, the number of real-time transactions 48.6 billion in India were almost three times that of China, and almost seven-times greater than the combined real-time payments in US, Canada, UK, France and Germany.

## **SUPPORTING ENTREPRENEURSHIP**

PM-SVANidhi is a unique scheme to help India's grassroots entrepreneurial spirit. Under the scheme, loans were sanctioned to 31.9 lakh street vendors. Rs. 30,000 crore were provided to Scheduled Castes (SC), Scheduled Tribe (ST) and women through Stand-up India scheme. Under the Mudra scheme, approximately 35 crores loans have been sanctioned.

The Indian start-up eco-system has livened up with improvements in ease of doing business and unleashing of the inherent Indian

entrepreneurial talents. This is manifest in the large number of Indian companies entering the coveted billion- dollar unicorn category.

## **CONCLUSION**

The next decade is India's decade and its story will not be complete without Atma Nirbharta. To become an economic powerhouse, the PM's commitment to uplift the poor of the country will play a key role. The Covid-19 pandemic wreaked havoc across the globe and slowed down the global economy. All advanced economies are struggling to get back on the growth trajectory. India, because of its stellar management of the pandemic and well-thought-out policy response, is well on its path to recovery. According to IMF projections, India will grow by 8.2 per cent in the coming fiscal year.

This is the most promising growth outlook among all economies, including emerging economies. Both the Government and the Bharatiya Janata Party will dedicate all their efforts and energy to reclaim Indian economy's rightful place in the comity of nations. ■

## RESOLUTION-II

### POLITICAL RESOLUTION

***Full text of the 'Political Resolution' passed in the BJP National Executive meeting held in Hyderabad, Telangana on July 03, 2022.***

A nation brimming with self-confidence is moving rapidly towards the goals of 'Ek Bharat, Shreshtha Bharat'. India's last eight years have been filled with incredible achievements, unimaginable transformation, and incredible performance at all levels. Today, India is imbued with a newfound confidence, making it emerge as a leading force globally. Whether it is the COVID-19 pandemic, any natural calamity or even war, India is always ready to extend help to countries in crisis. The way India helped other countries during the COVID-19 pandemic has been applauded and acknowledged all over the world.

The nation started treading on the path of good governance and development as the politics of performance gained legitimacy, resulting in huge mandates even in state elections across the country. The pledge towards building 'Ek Bharat, Shreshtha Bharat' started showing results, and the mantra of 'Sabka Saath, Sabka Vikas, Sabka Vishwas, Sabka Prayas' started inspiring everyone to contribute to the nation building process. A massive churning can be seen on the ground. The BJP-led NDA has got a mandate from election to election and people have given an even bigger mandate in 2019. A confident nation started taking huge strides towards its destiny.

As Prime Minister Shri Narendra Modi committed his government to the welfare of the poor, oppressed, exploited, and deprived sections of society while focusing on the empowerment of women and youth, many innovative programs were launched, transforming their lives in a major way. Rural life, agriculture, farmers, and labourers became the core of these welfare programs, aiming to make them valuable partners in the onward march of the nation. Even during the

COVID-19 pandemic, the Garib Kalyan Anna Yojana was launched, ensuring food security for the poorest of the poor while extending help to women, divyaangis, senior citizens, and migrant labourers. One of the most notable achievements was to launch 'Made in India' vaccines and make them available to everyone for free, which helped in containing the pandemic in a big way. In the face of every challenge, India was able to find a solution under the strong and dynamic leadership of Prime Minister Shri Narendra Modi. From the welfare of the poorest of the poor to the emergence of a strong and confident India in every field – be it agriculture, renewable energy, climate change, start-ups, defence or space – India is making its presence felt everywhere. As the path for an 'Aatm Nirbhar Bharat' is being paved, a 'New India' is emerging.

## **BJP GETTING HUGE SUPPORT ACROSS THE COUNTRY**

The huge support of the people across India has once again been reflected in the massive mandate that the people have given to the BJP in the recently held assembly elections. In the four out of five states that went to the polls, the BJP has not only emerged victorious but also scripted a history of its governments getting re-elected after successfully completing their terms. In Uttar Pradesh, Uttarakhand, Manipur, and Goa, people have re-elected full-majority BJP governments, ending an era of political instability in these states. For the first time in decades in Uttar Pradesh, the same party government was re-elected and a chief minister got a people's positive mandate after completing the full term, that too with more than two-thirds majority. In Uttarakhand, people broke the trend of voting differently every five years and strongly supported the BJP for the second consecutive term. In Manipur, the BJP government was re-elected with a comfortable majority, and in Goa, the BJP has got the required numbers to form the government in the state.

From Panchayat to Parliament, from West to East and from North to South, the BJP is getting the blessings of the people everywhere. Just a few days ago, the BJP set a new record by winning all 26 seats in the Karbi Anglong Autonomous District Council of Assam. Similarly, the BJP-JJP alliance has won 25 seats out of 46 municipal corporation elections in Haryana. In the Tamil Nadu local body

elections too, the BJP got an unexpected victory in 308 seats, winning 22 seats in municipal elections, 56 in municipalities, and 230 in district panchayats, and the BJP has become the third largest party in Tamil Nadu. People have given their blessings to the BJP in the Legislative Council elections of Bihar, Uttar Pradesh, Karnataka and Maharashtra. In the recent Rajya Sabha elections also, the BJP has had more success than expected. Along with this, the BJP has had huge success in the Lok Sabha and Assembly by-elections as well.

The overwhelming blessings which the BJP continues to receive from the people under the dynamic and charismatic leadership of Prime Minister Shri Narendra Modi is a new phenomenon in Indian politics, defying the three decades of political instability in the country. The massive win in these four geographically and demographically distinct states shows that the politics of good governance, development, and performance has now created a lasting niche in the heart of Indian politics.

## **HISTORIC DECISION OF THE SUPREME COURT**

With the historic decision of the Supreme Court on the Gujarat riots, the dictum of 'Satyamev Jayate' has once again proven to be true. It is now fully established that attempts were made to maliciously target the then Chief Minister of the state, Shri Narendra Modi, in the Gujarat riots on the basis of a political conspiracy. As part of the vendetta politics of the Congress-led opposition, some so-called NGOs and 'intellectuals' and even a section of the foreign-run media, forming a complete 'ecosystem' were the part of the conspiracy. While enduring false allegations, baseless charges and malicious propaganda for years, he never let his faith in the Indian Constitution, judicial process and judicial system of the country be shaken, and finally he came out unscathed from all kinds of ordeals. The way the Hon'ble Prime Minister has demonstrated political tolerance, maturity, large-heartedness, and faith in democracy and the constitution for years is an example for Indian social life. For this, the BJP National Executive salutes him, and extends its heartfelt greetings to him.

It should be noted that the Hon'ble Prime Minister previously

came out clean from all levels of court judgments—from district to high court and now Supreme Court. This decision of the Hon'ble Supreme Court has also exposed a large political conspiracy against the Hon'ble Prime Minister, as the Hon'ble Supreme Court has ordered strict legal action against these conspirators. The Bharatiya Janata Party wholeheartedly welcomes this decision of the Supreme Court, and supports strict legal action against the guilty. Simultaneously, this executive strongly condemns such conspiratorial vendetta politics and demands that Congress and its allies immediately apologize to the entire nation for their complicity in this heinous conspiracy.

### **NEGATIVE POLITICS OF CONGRESS LED OPPOSITION**

It is extremely unfortunate that the parties that were in power for years are today not playing the role of a constructive opposition as envisaged under the Constitution of India, and are continuously violating democratic norms. To serve its politically vested interests, it is resorting to the politics of lies and deception. It seems that it neither has faith in the Constitution of India, nor has faith in the people of the country, nor does it have faith in democratic values. The Congress and its allies are deeply immersed in the politics of dynasty, casteism, and regionalism and are victims of ideological, opportunistic, and corrupt political culture. They want to stop the pace of development of the country by opposing every constructive step of Hon'ble Prime Minister Shri Narendra Modi, blocking the laws passed by Parliament while backing the politics of mob rule on the streets. This is the reason why the Congress led opposition is continuously losing the trust of the people.

While the nation was unitedly facing the challenges of the pandemic, some opposition parties were busy scoring political points through false propaganda and baseless campaigns. The nation will never forget the way the Congress and other opposition parties tried to break the morale of the nation by instilling fear, suspicion, and negativity in the hearts of people by questioning the nation's capability and by maligning "Made in India" vaccines. Whenever there was any crisis in the country or any action taken in the national interest, the Congress and its allies raised questions. Whether it was

the surgical strike by the army, air strike or any moment of bravery and valour of the Indian army on the border, Congress and its allies are always seen standing on opposite poles. Today, when the Congress President and its former President are questioned by the investigating agencies, the entire Congress opposes it by taking to the streets, but if there is any issue of national interest, the Congress party is seen opposing the nation itself. Due to dynastic politics, Congress has become synonymous with unprincipled, opportunistic, and corrupt politics in the country. There is no doubt that a party that does not practise internal democracy can never understand the real meaning of democracy. In desperation, Congress is pushing itself to its own destruction. The Congress today stands with the 'tukde-tukde gang' by collaborating with the divisive elements in the country and wants to spread confusion in the country. While Pakistan takes recourse to Congress leaders' statements in its statements against India, Congress leaders do not shy away from referring to Kashmir as a matter of the United Nations. Many of his statements provoke other countries to interfere in India's internal affairs and raise questions about India's sovereignty.

It is extremely unfortunate that in many opposition-ruled states the 'perpetually pessimistic' opposition has been opposing implementation of welfare schemes of the Central Government like Ayushman Yojana, thus depriving the citizenry of the country of the benefits accruing to them. Today, dynastic politics has become a threat to the parties functioning on principles and high ideals. It is highly unfortunate that many political parties of the country have also surrendered to the anti-democratic dynastic politics, casteism and regionalism.

## **EMPOWERMENT AND REPRESENTATION**

With the nomination of Shri Ram Nath Kovind for the post of President in the year 2017, and now with the nomination of Smt. Draupadi Murmu, Prime Minister Shri Narendra Modi has proved that the BJP is concerned about political representation and empowerment of all weaker and backward communities, including Scheduled Castes and Scheduled Tribes in the country.

The BJP-led NDA alliance has honoured the entire women and

tribal community of the country by announcing Smt. Draupadi Murmu's candidature for the top post of the country, and has strengthened the principle of all-inclusive politics in the country. While discharging many responsibilities in public life, Smt. Draupadi Murmu, who had to struggle against poverty and adversity in her life, by serving the poor, deprived, oppressed, and neglected, represents an excellent example to be emulated in society. She is not only a symbol of women power, but also represents the oppressed of this country. Her administrative experience, sensitivity, and efficiency will surely adorn the President's post.

This National Executive of the Bharatiya Janata Party appeals to all the political parties of the country, all the members of the electoral college of the Presidential elections, to vote unitedly in favour of Smt. Draupadi Murmu, and support the country's first woman from the Scheduled Tribes community to be elected as the President of India. This is a historic occasion when all of us are getting the privilege of electing a woman President from the tribal community of the country for the first time. It is a proud moment for the entire nation. Let everyone come forward to make an important contribution in this yagya.

### **INCLUSIVE GOVERNANCE AND WELFARE OF THE POOR**

As BJP Karyakartas observed, 'Samajik Nyay Pakhwada', the resolve to serve the poorest of the poor, deprived, exploited, and marginalised sections of society got reinforced through various programmes across the nation. The BJP has always been committed to the principles of 'Antyodaya' and believes that in the upliftment of the last man in society lies the development of the entire nation. A large number of innovative schemes under the visionary and charismatic leadership of Prime Minister Shri Narendra Modi are transforming the lives of the poorest of the poor, opening new avenues of opportunities for the marginalised and deprived, making life easier for women, youth, tribals and scheduled caste people while assuring a life of dignity and equity for every section of society. The last eight years have seen a huge jump in electricity access, sanitation access, access to drinking water, clean cooking fuel, bank accounts and mobile phones, enhancing the 'Ease of Living' of the

masses. The reduction of extreme poverty in the nation, even amid the pandemic, speaks volumes about the pro-poor policies of the Modi government. A large number of schemes like Ujjwala, PM Jan Dhan Yojana, Ayushman Bharat Yojana, PM Kisan Samman Nidhi, Crop Insurance Scheme, MSP 1.5 time of the investment, record procurement under MSP, bringing new crops under MSP, Soil Health Card, Neem Coated Urea, Garib Kalyan Yojana, PM Awas, and Jal Jeevan Mission are transforming the lives of the poorest of the poor, bringing huge relief to SC, ST, OBCs, women, youth, and the deprived sections of the society.

If these achievements are seen in the context of the two years of the COVID-19 pandemic, which led to an unprecedented global crisis at various levels, then these achievements appear to be extraordinary and amazing. It was a challenge that appeared insurmountable in India, but under the strong and determined leadership of Prime Minister Shri Narendra Modi, the nation not only tried to convert these challenges into opportunities but also led from the front in helping many needy countries across the world. The entire world witnessed India's firm resolve to fight the crisis when, for the first time, "Made in India" vaccines were produced in large quantities in India itself within a record time. It resulted in the success of the world's largest and fastest vaccination programme, which was able to provide more than 95% of India's huge population with at least one dose of vaccine within months. The opposition, which claimed that it would take 15 years to vaccinate everyone in India, is now speechless after 200 Crore doses have been administered in less than a year and a half. Not only this, these "Made in India" vaccines were made available to other needy countries, making India a leading country in the fight against the pandemic. The free ration, various assistance to the vulnerable section of the society, the Seva-Hi-Sangathan programme by millions of dedicated BJP karyakartas, the selfless commitment of doctors, nurses, paramedics, administrative staff, and Corona warriors, and the call of "Aatm Nirbhar Bharat" by the PM, launching innumerable initiatives during the COVID-19 pandemic, has further strengthened the faith of people in the indefatigable leadership of PM Shri Narendra Modi and the selfless commitment of the BJP karyakartas. The people of India are not only proud of these

achievements, but they are also confident of meeting any challenges that come their way as they strive for a brighter future

## **INDIA EMERGES ON THE WORLD FORUM**

The recent visit of Prime Minister Shri Narendra Modi to Germany, Denmark, France, Japan, and UAE; participation in the Indo-Nordic Summit, QUAD, and G-7 has not only broken new ground but also shows India's willingness to proactively forge partnerships in new areas. The new dynamism currently seen in India's foreign policy reflects its commitment to shouldering responsibilities on global issues while creating partnerships with various countries at different levels. It represents an India booming with newfound confidence under the visionary leadership of Prime Minister Shri Narendra Modi as it has come out of cold war hangovers by engaging with every country without reservations. The partnership with these European nations is set to boost India's prospects in various fields in the coming days while meeting the requirements of these partnering countries.

In the last two years of the COVID-19 pandemic, India has emerged as a major global leader. It not only successfully faced the challenges of the pandemic but actively helped other needy countries in their time of crisis by providing medicines, PPE kits, oxygen, vaccines, and medical equipment. The manner in which different countries appealed to Prime Minister Shri Narendra Modi to take the initiative in resolving the crisis due to the Russia-Ukraine war and the way Russia-Ukraine gave a window during the war so as to facilitate the evacuation of Indians from the war zones shows the growing stature of India at the global level. Apart from helping other countries in their time of crisis, whether be it the COVID-19 pandemic or any natural calamity, India has made five commitments at COP 26 on climate change and is working actively to fulfil those commitments. India's initiative to establish an 'International Solar Alliance' is winning accolades all over the world. Today, India, under the dynamic leadership of Prime Minister Shri Narendra Modi, is sharing global responsibilities and emerging as a new hope for the world. The foreign visits made by Shri Narendra Modi ji have strengthened the global standing of India and have acted as a

catalyst amongst the Indian diaspora. There is a sense of reignited pride amongst the Indian community, and they feel further attached to the chord of “Indianness” that binds us all. There is no doubt that the agreements signed with these nations will further build an enduring partnership with Europe while opening new areas of opportunity for all the partnering countries

## **PLEDGE OF A ‘NEW INDIA’**

The nation still remembers the misrule of Congress led UPA government at the centre when corruption, loot and scam had become the order of the day. The term, ‘policy paralysis’ was in vogue, with directionless governance and a leaderless government at the helm of affairs. The scenario throughout the country was filled with pessimism and hopelessness. Amid such a scenario, the nation gave a powerful mandate to the BJP with Shri Narendra Modi as prime minister of the country. Today, after eight years, the nation under the charismatic and visionary leadership of Prime Minister Shri Narendra Modi is scaling new heights every day.

It is due to the untiring efforts of the Prime Minister that today, through programmes like ‘Pragati’, various ongoing projects in the country are being reviewed and speeded up, and projects that have been pending for years are being completed. Unlike the working style of the previous governments, many projects have been completed before their scheduled time. We can see the result of this in the speedy execution of projects like Bogibeel Bridge, Eastern and Western Peripheral Expressway, and Atal Tunnel, which have been completed under the leadership of Prime Minister Shri Narendra Modi. The concept of ‘Cooperative Federalism’ has been realized by establishing continuous dialogue with all the chief ministers so that development and good governance in the country become accessible to the people. Its most effective result can be seen in the success achieved in controlling the corona pandemic across the country. Even the Padma awards have been completely democratized, and the hidden talents and those doing unique work in the interest of the country have been recognized, and honoured all over the country.

The result of the new work culture of ‘New India’ was that the

nation adopted a major tax reform like GST. By coordinating between different states, today the GST Council is setting an example of healthy democratic tradition in the whole world by taking every decision unanimously. Today, GST has been fully adopted by the people of the country, the result of which we can see in the record tax collection every month. This has strengthened the country's economy, freed the people from the mess of many types of taxes, and facilitated the smoothening of inter-state trade. Under this, the compensation amount of GST to the states has been continuously paid by the centre even during the COVID-19 pandemic. Along with the removal of Article 370, the enactment of the Citizenship Amendment Act, making stringent laws on triple talaq, implementation of 'One Rank-One Pension', establishment of the National War Memorial and National Police Memorial, Bodo and Bru-Reang Pact and many other historic decisions; the Prime Minister Gathshakti, PLI, Green Hydrogen, Promotion of Organic Farming, Improvement in work culture, Digital India Mission, Khelo India to give special encouragement to sports and Agneepath are paving the way for a 'New India'.

### **CALL TO THE NATION**

As a confident India rises on the strength of its own and with the resolve to realise the dream of an 'Aatm Nirbhar Bharat', a change with a rare kind of dynamism can be seen everywhere. An India that can face the COVID-19 pandemic for two long years without faltering even once while extending a helping hand to other countries is certainly a new phenomenon. An India that can manufacture vaccines, an India that can turn all challenges into opportunities by launching various reforms during a crisis, an India that can provide free rations to 800 million people, care for vulnerable sections of society during a pandemic, and provide free vaccines to all seems impossible to those who witnessed the UPA's misrule just eight years ago. It has been possible under the dynamic and visionary leadership of Prime Minister Shri Narendra Modi, who has inspired millions of committed BJP karyakartas and selfless people across the country through his tireless efforts. The result is that a new India has emerged, which no longer languishes behind but completes the

target before the appointed time. As India realizes its inner strength, the goals of 'Aatmnirbhar Bharat' are now not difficult to achieve.

For the development of Maharashtra and the welfare of the people of the state, the Bharatiya Janata Party has supported Shri Eknath Shinde as Chief Minister and Shri Devendra Nath Fadnavis has taken oath as Deputy Chief Minister from the BJP. Due to the opportunistic and unprincipled alliance of 'Maha Vikas Aghadi' in the state, the development of Maharashtra was stopped and the people were facing massive corruption and misgovernance. This step has once again proven that the BJP never craves power but believes in serving the people selflessly and working for their welfare. With the goal of serving the people of Maharashtra under the leadership of Prime Minister Shri Narendra Modi, we will again take the state forward on the path of development and good governance.

After independence, the BJP emerged as the only party that demanded and supported many reforms in the interest of democracy and implemented them whenever given a chance in the government so that the democratic systems of the country could be strengthened even more. As a political party that draws inspiration from the country's glorious past, the BJP is determined to create a 21st century India with strong infrastructure, providing immense opportunities for youth and development of every sector through futuristic policies. Today, the country is moving forward with the positive politics of the Bharatiya Janata Party while defeating the negative politics of the Congress led opposition election after election. The Bharatiya Janata Party calls upon the people of the country to completely defeat the divisive, opportunistic, unprincipled, and corrupt politics of dynasty, casteism, and regionalism and promote development, good governance, and 'politics of performance' even more. Strengthen and unite in favour of an all-inclusive politics of welfare for the poor. ■

## **WE ARE COMMITTED TO SEEING A BETTER STANDARD OF LIVING FOR THE POOR: SHRI RAJNATH SINGH**

*The Union Defence Minister, Shri Rajnath Singh presented the 'Economic and Garib Kalyan Sankalp' Resolution in the BJP National Executive meeting held on 02 July, 2022. Excerpts:*

**F**rom the day of the formation of the government, all our economic policies were focused on the welfare of the poor.

On August 15, 2014, when the Prime Minister gave his first speech from the Red Fort, resolutions like Jan-Dhan Yojana, Swachh Bharat, Beti Bachao-Beti Padhao were inspired by the objective of poor welfare. From there, the world's largest financial inclusion program started. Crores of citizens got real power through DBT. In the Mudra Yojana, when 34 crore beneficiaries were made self-reliant, the same sentiment was also seen in providing food grains to 80 crore needy people during the Covid period, and getting the free vaccine for all.

Today, India has come on the list of top 25 countries in the world in terms of exports in the defence sector. Today, India has reached a position to export not only the rifles but also BrahMos missiles. Philippines has booked the first order.

In our government, the International Solar Alliance established its headquarters in Gurugram, it was not imaginable in the previous governments. We are all ready to take a giant leap to make India a self-reliant country.

PM Shri Modi has made many reforms, and efforts for the economic development of the country in the last eight years. At the same time, structural reforms have also been done in many places. On July 1, a major economic reform of 'Aatmanirbhar Bharat', GST, has completed five years.

The various advantages of the GST are noteworthy. Earlier, the tax on most of the goods of the country was more than 31 percent,

today, the country's highest tax rate is 28 percent. For the first time, direct tax collection has exceeded indirect tax collection.

During the Covid crisis, when there was a sudden shortage of oxygen, the people resolved it under the leadership of the Prime Minister. India took pledge that we would give the Covid vaccine to all the countrymen, and the icing on the cake was that this vaccine was made in our country. They said that it would take tens of years to vaccinate 130 crore people, but today, the vaccine is being administered to everyone. India is fully prepared to face any future challenge. India did the work to develop vaccines not only for its citizens, but also assisted nearly 100 countries of the world in immunization against Covid pandemic. When Covid crisis flooded the nation, the biggest challenge was to safeguard our interests against the raging pandemic. Our Prime Minister prepared the citizens of the country for this, and gave an economic package of Rs. 20 lakh crore rupees under the 'Self-reliant India' scheme. Apart from this, the other packages were also given. The effect of this was that the GDP growth rate, which was negative (-6.6 percent in 2021), increased to around 8 percent in 2022.

FDI worth 440 billion dollars has come into India in the last eight years. This is no small achievement. In the year 2021-22 itself, FDI of 83.5 billion dollars has come into India, which is a record FDI in a year, in the history of independent India.

We are committed to providing a better standard of living to the poor. The tears of the poor mothers and sisters have been wiped through Ujjwala Yojana. Today, LPG connections have reached 99% of the households in India. This has made the lives of the poor mothers and the sisters reasonably easy. It is also a big step in the direction of environmental protection. You are familiar with 'Ayushman Bharat Yojana.' You also know about 'Jal Jeevan Mission.' I don't want to go into too many details. It is the resolve of our government to make taps available in every Indian house, and clean water in every tap.

Out of 46 crore accounts opened through Jan-Dhan Yojana, more than half belonged to the poor mothers and the sisters. During the Covid Pandemic, 31 thousand crores of assistance given by the Modi government also reached them directly through

Direct Benefit Transfer (DBT). Earlier, in case of requirements women used to ask for money from men in both the rural and the urban areas, but the Prime Minister has created such a favourable situation for women that now men are asking for money from women.

During Covid itself, India's digital revolution also gained momentum. India, once dependent only on cash, is doing 6 billion digital transactions in just one month. It is doing transactions worth about ten trillion rupees. It has worked very effectively in the last eight years to promote grassroot entrepreneurship in India. Under the 'Pradhan Mantri Svanidhi Yojana,' about 32 lakh street vendors, i.e., 31.9 lakh, were given the loan facilities. About 30 thousand crore rupees loans are being given to SC / ST and the women through the Stand- Up Scheme.

You all are familiar with the Mudra Yojana. Thirty five crore entrepreneurs have come forward to take loans under Mudra schemes. A loan of eight lakh crore rupees has already been taken under the Mudra scheme. Of these loan takers, 68% are women, and this has resulted in increased employment opportunities in the country, and an enterprise-friendly environment has been created.

Can you imagine, India which had barely 400-500 Start-ups in 2014 has now grown to seventy thousand start-ups in eight years, and out of these, there are nearly hundred such companies whose valuation is more than 1 billion dollars, and are known as 'Unicorns' all over the world. ■

# TAKE INDIA TO THE HIGHEST POSITION IN THE WORLD IN EVERY FIELD: SHRI AMIT SHAH

*The Union Minister of Home and Cooperation, Shri Amit Shah presented the 'Political Resolution' in the BJP National Executive meeting held on July 03, 2022. Excerpts:*

If we look at the country's political situation, a big change came after 2014.

After a long time, a government with an absolute and a two-thirds majority came into power. After 30 years, the country got a stable government under the leadership of Modi ji.

We have given a decisive government, a government that takes tough decisions. The decisions of this government were never taken to please the people. The decisions of this government are such which are good for the people and country.

The country's political landscape has changed, and the work of changing the political standards of the country has also been done in these eight years.

The 2019 election outcomes and subsequent elections have made it clear that in the politics of this country, there is no place for family led parties. The people of the country have rejected family parties.

Eight years of Modi ji's rule has decided that only those who have the capability will lead, those who have loyalty to the country will lead, and those who have the resolve to take the country forward with the vision will lead.

There is not a single family in the country that does not have a bank account. We have taken a pledge to give a house to every poor, and a plan has already been made to give a house to every poor. The work of providing electricity to every house is over, and the work of providing toilets to every house is also successfully culminated. Under the Ayushman Bharat scheme, 60 crore people

are being given free-of-cost health insurance up to five lakhs by the Narendra Modi government.

In 2019, Modiji created a Ram Janmabhoomi Trust after getting the mandate, and today the grand Shri Rama temple is being built at a rapid pace.

Modiji quietly but firmly took a historic decision of giving 5 kg food grains free of cost per person per month for two years to 80 crore people. The work of delivering five kilograms of food grains to such a large population across the world has never been done previously.

In view of the security of the country, 'Surgical Strike' and 'Air Strike' have not only bolstered the confidence of our forces, but this decision of Shri Narendra Modiji has also done the work of keeping 130 crore people on the same pitch of America and Israel with pride. No government could take the decision of one rank, one pension; but we have taken it.

We have brought back 22,500 people from Ukraine under 'Operation Ganga'. We have also brought back 5000 people from Yemen through 'Operation Rahat'. Under the 'Vande Bharat Mission', the Narendra Modi government has done the work of getting back one crore 83 lakh people who were stranded abroad. On the front of the internal security of the country, Left Wing Extremism has also been reduced by 80 percent.

The Bodoland issue has been resolved. The land agreement has been done; the Karbi Anglong agreement has been done. We have removed 60 percent of the AFSPA, and since 2014 till now, more than 6 thousand militants have decided to put down their weapons and come back into the mainstream.

Modiji fulfilled the dream of our three generations on August 05, 2019, and abrogated Article 370, and 35A from Kashmir and brought democracy to the grass root level. Modiji also did the work of taking a decisive position on terrorism.

So far, merchandise exports have been worth 421 billion dollars. This is a record, and now it is a sign that India is going to become a hub of manufacturing. Service exports amounted to 254 billion dollars. The highest ever FDI, 83 billion dollars, came in the year 2022-23. There have been more than 70 thousand Start-ups. Out

of this, 45 percent of Start-ups are started by women. To reduce corruption, and bring transparency through GeM, the purchase of about 2.5 lakh crores has been made so far through GeM to make it corruption-free. DBT Corruption has also been reduced through Rs. 22 lakh crores DBT transfer to the people.

The Bharatiya Janata Party got a chance to elect two Presidents under PM Modiji. On the first occasion, we chose a Dalit face, and on the other occasion, we declared and supported candidature of a tribal woman.

An important verdict was issued by the Supreme Court on 2002 riots, and in this verdict, the allegations against our beloved leader Shri Narendra Modi Ji were declared outright lies, and politically motivated.

Shri Narendra Bhai has given us the program of 'Amrit Mahotsav' of Independence. With regard to 'Amrit Mahotsav', three main points have been put before us by Modi Ji. Firstly, pay respect to all the martyrs who sacrificed their lives for freedom of the nation. Pay respect to the freedom fighters, by remembering their lives and deeds. The young generation should take inspiration from them, and resolve to live for India. This is the true spirit of celebration of 'Amrit Mohotsav' of Independence. Secondly, every government has done something good in 75 years since independence; what India has done in various fields should be proudly placed before the world. And thirdly, considering the period of 75 to 100 years as the period of 'Amrit Kaal,' everyone should take a resolution to take India to the highest place in the world in every possible field. Let us all strive for excellence. ■

## THE COUNTRY HAS A DECISIVE LEADERSHIP AFTER YEARS: SHRI PIYUSH GOYAL

*The Leader of the House in Rajya Sabha and Union Minister Shri Piyush Goyal seconded the 'Economic and Garib Kalyan Sankalp' Resolution presented in the BJP National Executive Meeting held on 02 July, 2022. Excerpts:*

- Until 2014, there were two paths in front of the country, a 'bandage-solution', which calls for doing something immediately to assure the people that 'yes' things are fine. The second is by making fundamental changes that prepare the country for many years to come.
- Hon'ble Prime Minister Shri Narendra Modi wants to find a solution to every problem from its root. He is willing to prepare the country for many years to come by making fundamental changes.
- The country has a decisive leadership after years, who wanted every work to be result oriented. And making sure that the benefit of the result will actually reach the public or not. He keeps monitoring the result and ensures the 'monitoring' and its 'responsibility'.
- If digital technology had not been carried from village to village, people would have no use of mobile in their hands and then it would have been impossible to face the Covid pandemic.
- None could imagine that India could lead the pollution free electric car segment. But, India is making its presence felt in this field. Not only this, but due to technology, more than 400 schemes of the Modi government are directly reaching the public through DBT.
- Today, we are making a new record every year, we had exported items of 50 lakh crores till last year, this export did not happen by itself but the Prime Minister remained the guiding force behind it.
- In the coming times, India will chair the G-20 under the leadership of Prime Minister Shri Narendra Modi. How India should become the voice of developing and less developed countries, the voice of farmers, and the voice of fishermen? How to take care of micro and small industries and our small entrepreneurs? Regarding all this, the Prime Minister guided us from every global forum. ■

## UNPRECEDENTED WORK DONE IN SOCIAL SECURITY: SHRI MANOHAR LAL KHATTAR

*The Chief Minister of Haryana, Shri Manohar Lal Khattar seconded the 'Economic and Garib Kalyan Sankalp' Resolution presented in the BJP National Executive Meeting held on 02 July, 2022. Excerpts:*

- Central schemes like Ujjwala Yojana, Ayushman Bharat, Kisan Samman Nidhi, Jan Dhan Yojana, Mudra Yojana, investment opportunities and employment; all of these welfare measures of the government have registered historic progress.
- At the same time, the thinking of the Prime Minister is exactly like the ideology of 'Antyodaya'. This thinking is not only limited to the individual and the family but also there is an emphasis on the development of every person standing at the last rung of society.
- The government has paid special attention to areas that are left behind over periods of time. For example, 112 districts of the country were identified that were generally lagging behind the mainstream. The 'Aspirational District Program' was started by the Government of India. For this, 112 districts were selected from all over the country, which was backward i.e. which could not develop properly. To improve these districts, the 'Aspirational District Program' was started.
- We have done phenomenal work in social security. Taking advantage of Family Identity Cards, the Old Age Pension Scheme of Haryana has started. Under this scheme, an amount of Rs 2500 per month will be given to senior citizens of 60 years of age and above. ■

## **3E- EMPOWERMENT THROUGH EDUCATION, EMPLOYMENT AND EMPOWERMENT: SHRI BS BOMMAI**

*The Chief Minister of Karnataka, Shri Basavaraj Somappa Bommai seconded the 'Political Resolution' presented in the BJP National Executive Meeting held on 03 July, 2022.*

**Excerpts:**

- The Bharatiya Janata Party and our leader Shri Narendra Modi have done 'Good-Governance' and also 'Good-Politics'. He has also done 'Peoples'-Politics'.
- For the backwards, Dalits, they can get respect only through education, employment and empowerment. Prime Minister Shri Narendra Modi gave them a chance with '3-E'- Education, Employment and Empowerment.
- It is because of the policies of PM Shri Narendra Modi, the 'part', which was not connected with the mainstream due to militancy for a long time, is now connected with the mainstream, and common people from all over the North-East have now joined the mainstream.
- We have a 'foot-hold' in Karnataka in South India. The election is coming in 2023. With the blessings of Shri Narendra Modi and under the guidance of BJP National President Shri JP Nadda, I want to assure you that in 2023; we will come to power again with a huge margin for the 'Pro-Incumbency', and we will work for the people with all our heart and soul.
- The opposition, especially in South India, is doing very 'delusive politics'. They know they can't beat the image of Shri Narendra Modi, the Sangathan Shakti of BJP, and the pro-people programs of this government. So, they have started 'Delusive politics' across the country.
- Modiji has a different vision for 'economic development'. 'Economic development' means the development of those at the bottom of the pyramid, and those who work on the land or on the grassroot level. ■

## **BJP IS A PARTY OF ALL CLASSES: SHRI HIMANTA BISWA SARMA**

*The Chief Minister of Assam, Shri Himanta Biswa Sarma seconded the 'Political Resolution' presented in the BJP National Executive meeting on July 03. Excerpts:*

- We heard the speech of Mizoram State President Vanlalmuaka ji. In the speech, he said that Mizoram has a Mara Autonomous Council. There the Bharatiya Janata Party won.
- Our government came to power again in Arunachal, where about 30% of voters are Christians. Our government came to power also in Manipur. There, 40 percent of the voters are Christians. A few days back, an autonomous council election was held in Assam. The Bharatiya Janata Party got all the seats in that Council. There too 35% are Christians. Today, under the leadership of Prime Minister Shri Narendra Modi, the Bharatiya Janata Party has broken the myth that the BJP is only a party of the Hindus. Today, BJP has become a party of 130 crore Indians.
- I come from the North East, never imagined that 4,250 km of National Highway would be built in just six years. Earlier, there was only one way to reach Tawang, but now, a tunnel will be built there, and the railway line will also go there.
- During the earlier Congress government, the Defence Minister of India used to say that construction of roads to Tawang is not possible because it will spoil the relation with China. However, today, the Prime Minister is determined to take the train to Tawang, and the work of making another route has also started.
- Every state of North East has been connected with Rajdhani Express today. ■

## **WORK HAS BEEN DONE ACCORDING TO ASPIRATIONS OF THE PEOPLE: YOGI ADITYANATH**

*The Chief Minister of Uttar Pradesh, Yogi Adityanath made a speech in the BJP National Executive meeting. Excerpts:*

- In 2014, when the Prime Minister Shri Narendra Modi gave his first statement after becoming the leader of NDA, at that time he said that our government is not for any person, any caste, any religion or sect, but for the villages of this country. We will work without discrimination for the poor, farmers, youth, women, and every section of society. Tremendous progress has taken place in the country in the last eight years because this government of the Bharatiya Janata Party-led coalition has been working according to the hopes and aspirations of the common people. The public support we are getting is the result of that.
- Within the last five years, Uttar Pradesh has tried to take a giant leap under the guidance of the respected Prime Minister. In 2016-17, the economy of Uttar Pradesh was counted at sixth place in the country. Today, it is on the way to attaining the second position. The per capita income of Uttar Pradesh has almost doubled. Uttar Pradesh has increased its revenue during this period. We have also got the benefit of GST. In a state like Uttar Pradesh, where only 80 thousand crore rupees could be received in the tax revenue state, today it has crossed 1 lakh 55 thousand crore rupees. It is increasing continuously. We could barely get 49 thousand crore rupees in 2016-17 in Uttar Pradesh through 'Sale Tax' and 'VAT'. Today we are getting about 95 thousand crore rupees from this.
- In 2016-17, the revenue we used to get under excise tax in Uttar Pradesh was only 12 thousand crores. Today, in 2021-22, we have got revenue of more than 36 thousand crore rupees only through this. Uttar Pradesh has also made a double jump in stamp and registration.

- Now, the new government has been formed, and we have presented our budget. The budget of Uttar Pradesh was not even Rs 3 lakh crore five years ago; today, it seems to be moving ahead at a fast pace, crossing Rs 6 lakh 15 thousand crores this time. Uttar Pradesh ranked 14th within the country in the 'Ease of Doing Business'. It has become an excellent destination for the investment proudly securing second position.
- There is an innovative scheme for all 75 districts of Uttar Pradesh. Its mapping was done. Its branding was also taken care of. The arrangements were made for its marketing. Also, the arrangements were made for its packaging. As a result, today, each district of Uttar Pradesh has a unique product and presents Uttar Pradesh as an export hub.
- The work done in the MSME sector in the last five years has also increased employment, and has succeeded in reducing the state's unemployment rate. Today, the unemployment rate in Uttar Pradesh, which was 18 percent in 2016-17, according to the latest SEBI data, has now come down to 2.9 percent.
- Under the leadership and guidance of the respected Prime Minister, the Bharatiya Janata Party got success in more than two-thirds of the seats in the recently held Uttar Pradesh assembly elections. The assembly elections were held on 36 local body seats in the state; out of those 36 seats, the Bharatiya Janata Party won 33 seats.
- After 87 years for the first time, there is no member of Congress in the Legislative Council. Even in the Legislative Council, more than two-thirds of the seats with more than two-thirds of the votes are secured by the Bharatiya Janata Party.
- In the Corona period, 80 crore people got free ration, they received it without discrimination. And along with this, a resident of Uttar Pradesh who holds a ration card, can take one's quota of ration anywhere in the country through national portability.
- Let us talk about the Prime Minister's Swamitva Yojana; for a person in the rural area, through the drone survey, through the proposal of the Gram Panchayat, that person is getting the

- ownership of the land. In a state like Uttar Pradesh,
- till now, more than 34 lakh families have got Gharani for the first time on their traditional land where they had their own house, and they are getting the benefit of Swamitva Yojana.
  - In a state like Uttar Pradesh, 45 lakh poor people get houses without discrimination; this is the basis for massive change. Without any discrimination, 15 crore people received ration in the Corona period. We are a government of double engine, it is unprecedented to get ration twice a month.
  - We are fortunate to witness the 'Amrit Mahotsav' year of independence. It is our good fortune that we are able to see the construction work of Maryada Purushottam Shri Ram temple in front of our own eyes. It is our good fortune that we are able to see the grand and divine complex of Baba Vishwanath in Kashi.
  - I once again express my heartfelt gratitude to the respected Prime Minister for completing the successful tenure of eight years in central government, and for the G-7 summit in which he presented the product of Uttar Pradesh to the global leaders.
  - I congratulate Rashtriya Adhyaksh ji, who gave me an opportunity to speak here. On this occasion, I express my heartfelt gratitude to the respected Rashtriya Adhyaksh ji. I can say with confidence that the inspiration of 'Sabka Saath, Sabka Vikas, Sabka Vishwas, and Sabka Prayas' is clearly seen in the people of the country. We are also witnessing this, and 135 crore citizens of India are witnessing this. We all consider ourselves lucky for this. ■

# STATEMENT ON ECONOMIC, SOCIAL AND HUMAN DEVELOPMENT OF TELANGANA

*The National Executive of the Bharatiya Janata Party expressed its deep concern over the severe deterioration of economic, social and human development in the state of Telangana. In a Press Release, the party highlighted the deplorable state of law & order and health parameters in the state. We are publishing the Press Statement on Telangana:*

## **BJP SPEARHEADED A SEPARATE TELANGANA**

- The struggle for the separate state of Telangana is one of the momentous episodes in the post-independent history of India. The movement in its many phases witnessed the sacrifice of scores of youth with some taking the recourse to supreme sacrifice.
- The collective will of the people of Telangana, amply supported by a constructive struggle of the BJP, created a compelling situation that led to the formation of Telangana state in 2014.
- It is evident that the BJP was at the forefront of the movement for a separate Telangana state, and Telangana became a possibility only due to its proactive and unequivocal support.

## **UNFULFILLED ASPIRATIONS**

- Eight years after the historic achievement of a separate Telangana, the people of the state feel terribly betrayed as their expectations and hopes have continuously been belied. Paradoxically, those very people who reaped political benefit using the name of Telangana stood at the forefront in perpetrating fraud against the people.
- After eight years of the current dispensation, the position of Telangana has become far worse.
- The BJP did not support the Telangana movement to hand it over to the whims of a family, and to enable the family to amass

illicit wealth.

- The BJP supported Telangana with the intention that the aspirations of the people of Telangana, especially the youth, students, farmers, and other marginalized sections, would fructify.
- The universities of Telangana, whose role was critical and crucial in the formation of Telangana are in dismal condition with 70% of the faculty positions remaining vacant.
- The state of school education is even worse with no recruitment of teachers.
- The hospitals in Telangana are also in a pathetic condition.

### **TRS FAILED MISERABLY ON ALL METRICS**

- The TRS has failed miserably on all the three metrics of the Telangana movement, Neellu, Nidhulu and Niyamakalu (water, funds, and filling employment vacancies). It would not be an exaggeration to state that the people of Telangana feel that they have fallen from the frying pan directly into the fire under the present dispensation.

### **NEED FOR A NEW TELANGANA LIBERATION MOVEMENT**

- During the last eight years Telangana witnessed a brazen and blatant attempt to perpetuate a dynasty. Governance is centered around the family, which obviously leads to rampant corruption.
- The law and order situation is dismal in the state.
- We witness a sorry state of Telangana pervaded with despotism, unbridled nepotism, and brazen arrogance, which the Telangana people have always resisted.
- The BJP wanted a Telangana where all the people, especially the youth, would be happy by way of finding opportunities for employment, and for the sustenance of lives and livelihoods.
- Farmers don't get adequate support from the government

## **BJP – THE REAL AND ONLY OPTION FOR A DEVELOPED, INCLUSIVE TELANGANA**

- The BJP has been growing steadily in Telangana.
- The growth of the BJP has obviously become an eyesore for the Chief Minister and he has started a no holds barred criticism against the Union Government.
- Further, the success of the Prajasangrama Yatra launched by the Party president has already completed two phases, and has been receiving overwhelming support from the people. This has further upset the Chief Minister who has now become insecure and superstitious.
- The frustration of the Chief Minister and his cabinet colleagues clearly reflects the fact that BJP is growing stronger in the state.
- It is evident that only a double-engine government whose conviction is nation and nation alone would be able to lend meaning to the spirited struggle of the people of Telangana. ■

## **BJP NATIONAL EXECUTIVE: A BRIEF REPORT**

The Bharatiya Janata Party's two day National Executive meeting was held in Hyderabad, Telangana on 02-03 July, 2022. BJP National President Shri Jagat Prakash Nadda inaugurated the National Executive meeting in the august presence of the Hon'ble Prime Minister Shri Narendra Modi. The members received Prime Minister's guidance during the entire session of the Executive meeting. Earlier, on reaching the venue the Prime Minister Shri Narendra Modi was given a rousing welcome.

On 01 July, 2022 BJP National President Shri Jagat Prakash Nadda inaugurated an exhibition. After that the meeting of National Office Bearers was held on July 02 in two sessions.

The meeting of the National Executive Committee was held on July 02 in two sessions and on the next day on 03 July in three sessions, and concluded with the National Anthem. The inaugural speech was delivered by the BJP National President Shri Jagat Prakash Nadda. Thereafter, two-minute silence was observed to pay respect to the senior party karyakartas and prominent personalities who passed away, and people who lost their lives in natural calamities in last couple of months.

Two resolutions 'Economic and Garib Kalyan Sankalp' and 'Political Resolution' were passed in the meeting. Union Defence Minister Shri Rajnath Singh presented the 'Economic and Garib Kalyan Sankalp' on 02 July, 2022, and it was seconded by Leader of House in Rajya Sabha and Union Minister Shri Piyush Goyal, and Haryana Chief Minister Shri Manohar Lal Khattar. Union Home and Cooperation Minister Shri Amit Shah presented the 'Political Resolution' on July 03, 2022. It was seconded by the Chief Minister of Karnataka, Shri Basavaraj Somappa Bommai and the Chief Minister of Assam, Shri Himanta Biswa Sarma.

The Prime Minister of the country, Shri Narendra Modi addressed the concluding session of the two-day BJP National Executive Meeting on 03 July, 2022 and urged all the party Karyakartas and Office Bearers to take a vow to establish the country as a

'Vishwaguru' during the 'Azadi Ka Amrit Kaal'.

In addition, a report of the party's performance in the recently held state elections was presented to the National Executive meeting. Simultaneously, the future programs and organizational activities were discussed. Innovative and transformational initiatives of the State Governments of Assam, Haryana, Uttar Pradesh and Himachal Pradesh were also discussed.

## **48 HOUR 'SAMVAD AUR SAMARTHAN' PROGRAM ORGANISED IN 119 ASSEMBLIES OF TELANGANA**

Prior to the BJP National Executive, a two days program was organized in which the Senior Karyakartas interacted with people in 115 out of 119 Legislative Assemblies of Telangana. Under this Pravas program senior leader of the party held meetings with local workers in 115 Assemblies and a dialogue was established with local workers. A call was given to take the programs of the party and last eight years achievement of the Central Government under the leadership of Hon'ble Prime Minister Shri Narendra Modi to the people. Under this program, meetings were organized with the local front Office Bearers, discussions were held on the expansion of the organization, and meetings were held with all the Cells and Booth heads, which created a sense of enthusiasm and confidence in each and every local worker. During this program, senior party leaders visited cultural and social establishments in the local area and had a meal in the house of SC, ST or senior workers. This instilled a sense of respect among the local workers. This shows the tradition of the BJP organization to connect with the common man, to instill confidence in the common Karyakarta.

## **LINGUISTIC COMMUNITY MEETINGS: JUNE 30, 2022 - JULY 2, 2022**

Under the 'Samajik Samvad', Linguistic Dialogue Meetings were organized in Hyderabad from 30 June, 2022 to 02 July, 2022. In these meetings, programs were organized on Tamil, Malayalam, Punjabi, Assamese, Marathi, Rajasthani, Oriya, Kannada, Haryanvi and the local languages of Uttar Pradesh, North-East states, Bihar, Madhya Pradesh, and Jharkhand. The number of people present

in these meetings, organized for different linguistic groups, ranged from 100 to 1000.

### **MASSIVE GATHERING IN 'VIJAY SANKALP SABHA'**

A huge public meeting was organized at the Parade Ground in Hyderabad on the evening of July 3, in which people coming from every corner of Telangana reverberated the city with the slogans of 'Modi-Modi'. More than four lakh people attended this public meeting which started at 7 pm. Addressing the gathering, the Prime Minister Shri Narendra Modi said, "All-round development of Telangana is one of the first priorities of the Bharatiya Janata Party. Following the mantra of 'Sabka Saath, Sabka Vikas, Sabka Vishwas and Sabka Prayas', we are continuously striving for the development of Telangana.

Addressing the massive gathering at 'Vijay Sankalp Sabha', BJP National President Shri Jagat Prakash Nadda urged the people of Telangana to end the dynastic and corrupt rule of the TRS government. He requested the public to give an opportunity to implement the welfare oriented developmental policies of the BJP for all sections of the society.

The Union Defence Minister Shri Rajnath Singh, Union Home & Cooperation Minister Shri Amit Shah, Telangana State President Shri Bandi Sanjay Kumar, Uttar Pradesh Chief Minister Yogi Adityanath, Union Ministers Shri Piyush Goyal, and Shri G. Kishan Reddy along with several senior BJP leaders addressed the gathering. ■

**Telangana State BJP President Shri Bandi Sanjay Kumar welcoming the Prime Minister, Shri Narendra Modi at the 'Vijay Sankalp Sabha' in Hyderabad, Telangana on July 03, 2022 along with BJP National President Shri Jagat Prakash Nadda, Defence Minister Shri Rajnath Singh and Union Home and Cooperation Minister Shri Amit Shah**

**A panoramic view of 'Vijay Sankalp Sabha' held on 3rd July, 2022 at Hyderabad, Telangana**

“

THIS 'AMRIT KAAI' OF 25 YEARS WILL BRING A BRIGHT FUTURE FOR THE BJP AS WELL AS THE BRIGHT FUTURE OF INDIA. WE ALL HAVE STARTED WITH THE DREAM OF BUILDING A 'NEW INDIA' BEFORE OUR EYES.

**Shri Narendra Modi**  
Hon'ble Prime Minister

”

**BHARATIYA JANATA PARTY**
